

Contents

Preface	ix
Program Committee and Additional Reviewers	xi
Part I: Parallel and distributed algorithms	
The Wandering Token: Congestion Avoidance of a Shared Resource <i>Augusto Ciuffoletti</i>	3
A Locality Optimizing Algorithm for Developing Stream Programs in Imagine <i>Jing Du, Xuejun Yang, Canqun Yang, Xiaobo Yan, Yu Deng</i>	13
Granular SSOR Preconditioning Placed on Dynamic SMP Clusters with Communication on the Fly <i>Boguslaw Butrylo, Marek Tudruj, Lukasz Masko</i>	23
Bulk Synchronous Parallel ML with Exceptions <i>Louis Gesbert, Frédéric Gava, Frédéric Loulergue, Frédéric Dabrowski</i>	33
Part II: Networking and communication	
A New Approach to MPI Collective Communication Implementations <i>Torsten Hoefler, Jeffrey M. Squyres, Graham Fagg, George Bosilca, Wolfgang Rehm, Andrew Lumsdaine</i>	45
Supporting MPI applications in P-GRADE Portal <i>Zoltán Farkas, Zoltán Balaton, Péter Kacsuk</i>	55
Tuned: An Open MPI Collective Communications Component <i>Graham E. Fagg, George Bosilca, Jelena Pješivac-Grbović, Thara Angskun, Jack J. Dongarra</i>	65
Self-Healing Network for Scalable Fault Tolerant Runtime Environments <i>Thara Angskun, Graham E. Fagg, George Bosilca, Jelena Pješivac-Grbović, Jack J. Dongarra</i>	73
Supporting Seamless Remote I/O Using a Parallel NetCDF Interface <i>Yuichi Tsujita</i>	81

Part III: Grid and web services

- Generating Semantic Descriptions of Web and Grid Services 93
Marian Babik, Ladislav Hluchy, Jacek Kitowski, Bartosz Kryza
- Legacy Code Support for Service-oriented Production Grids 103
Thierry Delaitre, Tamás Kiss, Gábor Terstyánszky, Stephen Winter, Péter Kacsuk
- Client-Side Task Support in Matlab for Concurrent Distributed Execution 113
Christian Hoge, Dan Keith, Allen D. Malony
- Message Level Security For Grid Services Using S/MIME 123
Daniel Kouřil, Ondřej Krajíček, Martin Kuba, Michal Procházka

Part IV: Grid infrastructure

- Fault Tolerant Grid Registry 135
Marek Kasztelnik, Marian Bubak, Cezary Górka, Maciej Malawski, Tomasz Gubala
- Secure application deployment in the Hierarchical Local Desktop Grid 145
Attila Marosi, Gábor Gombás, Zoltán Balaton
- Designing Distributed Mediator Component for the C-GMA Monitoring Architecture 155
Ondřej Krajíček, Andrea Ceccanti, Aleš Křenek, Luděk Matyska, Miroslav Ruda
- User Oriented Grid Testing 165
Miklós Kozlovszky, Krisztián Karóczkai, István Márton, András Schnautigel, Péter Kacsuk, Gábor Hermann, Ramon Harrington, Danielle Martin, Carsten Winsnes, Thomas Strodl

Part V: Advanced grid techniques

- Application and Middleware Transparent Checkpointing with TCKPT on Clustergrid 179
József Kovács, Rafal Mikolajczak, Radoslaw Januszewski, Gracjan Jankowski

<i>Contents</i>	vii
UML based Grid Workflow Modeling under ASKALON <i>Jun Qin, Thomas Fahringer, Sabri Pllana</i>	191
A Taxonomy of Grid Resource Brokers <i>Attila Kertész, Péter Kacsuk</i>	201
Towards an Agent Integrated Speculative Scheduling Service <i>László Csaba Lőrincz, Attila Ulbert, Zoltán Horváth, Tamás Kozsi</i>	211
Author Index	223
