Preface	VII
Notation	XV
Introduction and Summary	1
A. Basic Notation	2
B. Stochastic Control Problems and Summary	3
B1. Optimal Classical Control Problem	5
B2. Optimal Stopping Problem	9
B3. Discrete Approximations	10
B4. Option Pricing	19
B5. Hereditary Portfolio Optimization	23
C. Organization of Monograph	34
1 Stochastic Hereditary Differential Equations	37
1.1 Probabilistic Preliminaries	40
1.1.1 Gronwall Inequality	40
1.1.2 Stopping Times	42
1.1.3 Regular Conditional Probability	43
1.2 Brownian Motion and Itô Integrals	45
1.2.1 Brownian Motion	45
1.2.2 Itô Integrals	48
1.2.3 Itô's Formula	52
1.2.4 Girsanov Transformation	53
1.3 SHDE with Bounded Memory	54
1.3.1 Memory Maps	54
1.3.2 The Assumptions	57
1.3.3 Strong Solution	58
1.3.4 Weak Solution	62
1.4 SHDE with Unbounded Memory	66
1.4.1 Memory Maps	67

1.5	Markovian Properties	76
1.6	Conclusions and Remarks	78
2	Stochastic Calculus	79
2.1	Preliminary Analysis on Banach Spaces	79
2.1.1	Bounded Linear and Bilinear Functionals	80
2.1.2	Fréchet Derivatives	81
2.1.3	\mathcal{C}_0 -Semigroups	82
2.1.4	Bounded and Continuous Functionals on Banach Spaces	85
2.2	The Space C	89
2.3	The Space M	99
2.3.1	The Weighting Function ρ	100
2.3.2	The \mathcal{S} -Operator	102
2.4	Itô and Dynkin Formulas	106
2.4.1	$\{x_s, s \in [t, T]\}$	106
2.4.2	$\{(S(s), S_s), s \geq 0\}$	112
2.5	Martingale Problem	116
2.6	Conclusions and Remarks	124
3	Optimal Classical Control	127
3.1	Problem Formulation	129
3.1.1	The Controlled SHDE	129
3.1.2	Admissible Controls	132
3.1.3	Statement of the Problem	133
3.2	Existence of Optimal Classical Control	134
3.2.1	Admissible Relaxed Controls	137
3.2.2	Existence Result	140
3.3	Dynamic Programming Principle	153
3.3.1	Some Probabilistic Results	153
3.3.2	Continuity of the Value Function	158
3.3.3	The DDP	159
3.4	The Infinite-Dimensional HJB Equation	165
3.5	Viscosity Solution	168
3.6	Uniqueness	175
3.7	Verification Theorems	191
3.8	Finite-Dimensional HJB Equation	192
3.8.1	Special Form of HJB Equation	192
3.8.2	Finite Dimensionality of HJB Equation	195
3.8.3	Examples	199
3.9	Conclusions and Remarks	201
4	Optimal Stopping	203
4.1	The Optimal Stopping Problem	204
4.2	Existence of Optimal Stopping	208

4.2.1	The Infinitesimal Generator	208
4.2.2	An Alternate Formulation	210
4.2.3	Existence and Uniqueness	218
4.3	HJB Variational Inequality	224
4.4	Verification Theorem	226
4.5	Viscosity Solution	228
4.6	A Sketch of a Proof of Theorem 4.5.7	234
4.7	Conclusions and Remarks	244
5	Discrete Approximations	245
5.1	Preliminaries	246
5.1.1	Temporal and Spatial Discretizations	247
5.1.2	Some Lemmas	248
5.2	Semidiscretization Scheme	249
5.2.1	First Approximation Step: Piecewise Constant Segments	250
5.2.2	Second Approximation Step: Piecewise Constant Strategies	257
5.2.3	Overall Discretization Error	264
5.3	Markov Chain Approximation	265
5.3.1	Controlled Markov Chains	267
5.3.2	Optimal Control of Markov Chains	270
5.3.3	Embedding the Controlled Markov Chain	272
5.3.4	Convergence of Approximations	274
5.4	Finite Difference Approximation	278
5.4.1	Finite Difference Scheme	280
5.4.2	Discretization of Segment Functions	289
5.4.3	A Computational Algorithm	291
5.5	Conclusions and Remarks	292
6	Option Pricing	293
6.1	Pricing with Hereditary Structure	297
6.1.1	The Financial Market	297
6.1.2	Contingent Claims	302
6.2	Admissible Trading Strategies	304
6.3	Risk-Neutral Martingale Measures	307
6.4	Pricing of Contingent Claims	309
6.4.1	The European Contingent Claims	311
6.4.2	The American Contingent Claims	313
6.5	Infinite-Dimensional Black-Scholes Equation	314
6.5.1	Equation Derivation	314
6.5.2	Viscosity Solution	320
6.6	HJB Variational Inequality	323
6.7	Series Solution	325
6.7.1	Derivations	325

6.7.2	An Example	328
6.7.3	Convergence of the Series	329
6.7.4	The Algorithm	331
6.8	Conclusions and Remarks	331
7	Hereditary Portfolio Optimization	333
7.1	The Hereditary Portfolio Optimization Problem	336
7.1.1	Hereditary Price Structure with Unbounded Memory	337
7.1.2	The Stock Inventory Space	340
7.1.3	Consumption-Trading Strategies	341
7.1.4	Solvency Region	342
7.1.5	Portfolio Dynamics and Admissible Strategies	344
7.1.6	The Problem Statement	345
7.2	The Controlled State Process	346
7.2.1	The Properties of the Stock Prices	346
7.2.2	Dynkin's Formula for the Controlled State Process	351
7.3	The HJBQVI	352
7.3.1	The Dynamic Programming Principle	352
7.3.2	Derivation of the HJBQVI	353
7.3.3	Boundary Values of the HJBQVI	357
7.4	The Verification Theorem	366
7.5	Properties of Value Function	369
7.5.1	Some Simple Properties	369
7.5.2	Upper Bounds of Value Function	371
7.6	The Viscosity Solution	379
7.7	Uniqueness	390
7.8	Conclusions and Remarks	391
	References	393
	Index	401
