

## Contents

<i>Preface</i> .....	v
<i>Contributors</i> .....	xi
<hr/>	
<b>Introduction</b>	
<b>1 The role of structure: a dependability perspective</b>	
<i>Cliff B Jones, Brian Randell</i> .....	3
<b>2 The role of structure: a software engineering perspective</b>	
<i>Michael Jackson</i> .....	16
<hr/>	
<b>System Properties</b>	
<b>3 Structuring evolution: on the evolution of socio-technical systems</b>	
<i>Massimo Felici</i> .....	49
<b>4 Time bands in systems structure</b>	
<i>Alan Burns, Gordon Baxter</i> .....	74
<hr/>	
<b>Human Components</b>	
<b>5 Procedures, programs and their impact on dependability</b>	
<i>Denis Besnard</i> .....	91
<b>6 Cognitive conflicts in dynamic systems</b>	
<i>Denis Besnard, Gordon Baxter</i> .....	107

---

## Systems Descriptions

---

<b>7</b>	<b>Architectural description of dependable software systems</b>	
	<i>Cristina Gacek, Rogério de Lemos</i>	127
<b>8</b>	<b>Computational diagrammatics: diagrams and structure</b>	
	<i>Corin Gurr</i>	143
<b>9</b>	<b>Ethnography and the social structure of work</b>	
	<i>David Martin, Ian Sommerville</i>	169
<b>10</b>	<b>Faults, errors and failures in communications: a systems theory perspective on organisational structure</b>	
	<i>Peter Andras, Bruce Charlton</i>	189

---

## Guaranteeing Dependability

---

<b>11</b>	<b>Security implications of structure</b>	
	<i>Jeremy Bryans, Budi Arief</i>	217
<b>12</b>	<b>The structure of software development thought</b>	
	<i>Michael Jackson</i>	228
<b>13</b>	<b>On the use of diverse arguments to increase confidence in dependability claims</b>	
	<i>Robin Bloomfield, Bev Littlewood</i>	254
<b>14</b>	<b>Qualitative analysis of dependability argument structure</b>	
	<i>Mark A Sujan, Shamus P Smith, Michael D Harrison</i>	269
	<i>Index</i>	291
