

CONTENTS

1. ARISTOTLE'S COSMOLOGY

<i>Preface</i>	9
1.1. Plants and animals vs. celestial objects.....	11
1.2. The four traditional simple bodies.....	13
1.2.1. Fire, air, water and earth, and their qualities	13
1.2.2. The change of one simple body into another	14
1.2.3. The formation of compound bodies	15
1.2.4. The mass-ratio of two traditional simple bodies on the cosmological scale.....	16
1.2.5. The Sun and the change of the traditional simple bodies into one another	17
1.3. The first simple body	19
1.3.1. The upper body	19
1.3.2. The heavens.....	20
1.3.3. Diurnal rotation and the concept of the celestial sphere	21
1.3.4. Enter the first simple body	24
1.3.5. The non-diurnal motion of the Sun, the Moon and the planets	26
1.3.6. The first simple body and the four traditional simple bodies	30
1.3.7. The eternity of the first simple body's natural motion	32
1.3.8. The first simple body and the stars, the planets, the Sun and the Moon	32
1.4. Eudoxus' theory of homocentric spheres and Aristotle's <i>Metaph.</i> Λ 8.....	33
1.4.1. A brief outline	33
1.4.2. A closer view.....	35
1.4.3. "Failings" of the theory of homocentric spheres	38
1.4.4. Aristotle's physicalization of the theory of homocentric spheres	40
1.4.5. The unmoved movers in the heavens	41
1.4.6. <i>Ph.</i> Θ 10 and the theory of homocentric spheres	43
1.5. What comes next	46

2. THE STUFF OF THE HEAVENS

2.1. Introduction.....	50
2.2. The first simple body in <i>Cael.</i> A 2–3.....	53
2.2.1. The first simple body in <i>Cael.</i> A 2.....	53
2.2.2. The first simple body in <i>Cael.</i> A 3	57
2.2.3. The three senses of the noun <i>ouranos</i> in <i>Cael.</i> A 9	58
2.2.4. <i>aithēr</i>	60

2.3. The evidence from <i>Cael.</i> B 4.....	62
2.4. The first simple body in <i>Cael.</i> B 12	67
2.5. The evidence from the introduction to <i>Cael.</i> Γ.....	68
2.6. The evidence from the introduction to <i>Cael.</i> B.....	69
2.7. Fire as the second upper body in the <i>de Caelo</i>	71
2.8. The argument in <i>Mete.</i> A 3 for the existence of the first simple body	74
2.8.1. An outline.....	74
2.8.2. The preamble to the argument	75
2.8.3. The argument	77
2.8.4. The astronomical premises	80
2.8.5. Conclusion	84

3. ARISTOTLE AND THE THEORY OF HOMOCENTRIC SPHERES

3.1. Introduction.....	86
3.2. Is there a reference to the theory of homocentric spheres in <i>Cael.</i> B 6?.....	91
3.2.1. An argument in light of <i>Ph.</i> E 4.....	91
3.2.2. Aristotle and Callippus in <i>Metaph.</i> Λ 8.....	93
3.2.3. Concluding considerations	96
3.3. Is there a reference to the theory of homocentric spheres in <i>Cael.</i> B 12?.....	97
3.3.1. Introduction	97
3.3.2. The two problems Aristotle attempts to solve in <i>Cael.</i> B 12.....	98
3.3.3. The solution to the first problem.....	99
3.3.4. The first solution to the second problem.....	102
3.3.5. The second solution to the second problem.....	103
3.3.6. Conclusion.....	110
3.4. The conception of the heavens and celestial motions in <i>Cael.</i> B 10	111
3.4.1. Zodiacal motion as resisted by the diurnal rotation	111
3.4.2. <i>Cael.</i> B 12 and the conception of celestial motions in <i>Cael.</i> B 10	114
3.4.3. The rejection in <i>Cael.</i> B 9 of a Pythagorean celestial harmony	115
3.4.4. A hint for the forced motion of the wandering luminaries in <i>Cael.</i> B 1	116
3.5. <i>Cael.</i> A 4 and the theory of homocentric spheres.....	116
3.5.1. The last argument in <i>Cael.</i> A 4.....	116
3.5.2. The other arguments in <i>Cael.</i> A 4.....	120
3.5.3. The introduction to <i>Cael.</i> B 3 and the conclusion of <i>Cael.</i> B 2.....	121
3.6. <i>Metaph.</i> Λ 8	125
3.7. Conclusion	129
Appendixes	132
Bibliography	141
Index of passages	145
