## 1 Introduction to Network System Modeling

1.1	Systems Modeling in General . . . . .	1
1.2	Added-Value versus Common-Value Languages . . . . .	4
1.2.1	General . . . . .	4
1.2.2	AMLn versus UML . . . . .	7
1.2.3	The AMLn Process Context . . . . .	9
1.3	Contributions to AMLn . . . . .	13
1.4	Modeling Network Systems in AMLn . . . . .	15
1.4.1	Structures in Network System Models . . . . .	15
1.4.1.1	Layer Structure and Node Structure . . . . .	15
1.4.1.2	Management Plane and Managed Plane . . . . .	18
1.4.1.3	Network Levels . . . . .	19
1.4.2	Modeling Layer Structures . . . . .	20
1.4.2.1	The Control–Connectivity Separation . . . . .	21
1.4.2.2	The Actor–Agent Separation . . . . .	22
1.4.2.3	The Actor–Resource Separation . . . . .	23
1.4.2.4	The LSM–LPM Separation . . . . .	24
1.4.2.5	Agent Layers . . . . .	27
1.4.2.6	Common Agent Layers . . . . .	29
1.4.2.7	Common Actors . . . . .	30
1.4.3	Modeling Node Structures . . . . .	30
1.4.4	The Boundary Between Traffic and Management Systems . . . . .	36
1.4.5	Specifying Behavior in AMLn Models . . . . .	38
1.4.6	The Modeling Dimensions . . . . .	41
1.4.7	Views . . . . .	46

## 2 Layer Structures

2.1	Concepts Based on the OSI RM . . . . .	47
2.1.1	Layers and Layer Structures . . . . .	47
2.1.2	Service Types and Layer Types . . . . .	56

2.2	Discrimination (Connectivity Layers Only) . . . . .	58
2.2.1	Introduction . . . . .	58
2.2.2	Discrimination in the OSI RM. . . . .	59
2.2.3	Discrimination in the Internet . . . . .	61
2.2.4	Discrimination by Multiple Network Addresses . . . . .	62
2.2.5	Discrimination in Circuit-Switching Layers . . . . .	63
2.2.6	Summary . . . . .	64
2.3	Agents and Actors . . . . .	65
2.3.1	Introduction . . . . .	65
2.3.2	Agents and Actors in Control Layers . . . . .	68
2.3.2.1	A Case Study . . . . .	68
2.3.2.2	Agent Layers and Actor Layers . . . . .	79
2.3.2.3	Common Agent Layers . . . . .	80
2.3.2.4	Modeling the Actor Layers of an OSI Layer . . . . .	85
2.3.3	Agents and Actors in Connectivity Layers . . . . .	89
2.3.3.1	General Modeling Principles . . . . .	89
2.3.3.2	Submodels of Switching Actors . . . . .	93
2.3.3.3	Discrimination In Connectivity Layers . . . . .	99
2.3.4	Control Structures versus Connectivity Structures . . . . .	100
2.4	Stratum Levels . . . . .	105

### **3 Node Structures**

3.1	Introduction . . . . .	111
3.2	Logical Networks . . . . .	117
3.2.1	Definitions, Parameters, and Tables . . . . .	117
3.2.2	Simulation and Realization of Logical-Network Structures . . . . .	125
3.3	Route Properties and Symbols . . . . .	127
3.4	Route Type Examples . . . . .	132
3.4.1	Physical Routes . . . . .	132
3.4.2	Link Routes . . . . .	134
3.4.3	Switched Routes . . . . .	137
3.4.3.1	Introduction . . . . .	137
3.4.3.2	Routes in Circuit-Switching Network Systems . . . . .	140
3.4.3.3	Switched Routes in SS7 . . . . .	143
3.4.3.4	Switched Routes in the Internet . . . . .	145
3.4.4	Socket Routes . . . . .	146
3.4.5	Global Routes . . . . .	150
3.4.5.1	Introduction . . . . .	150
3.4.5.2	Global Routes in SS7 . . . . .	151
3.4.5.3	Global Routes in IP networks . . . . .	152
3.4.5.4	Global Routes for Mobile Services . . . . .	155

## 4 Modeling Vertical and Horizontal Partitions

4.1	Introduction . . . . .	159
4.2	Vertical Partitioning . . . . .	160
4.3	Horizontal Partitioning . . . . .	163
4.3.1	Introduction . . . . .	163
4.3.2	Refining Layer Interfaces . . . . .	165
4.3.3	Horizontally-Partitioned Logical-Network Structures . . . . .	169

## 5 Management and Traffic Systems

5.1	Introduction . . . . .	175
5.2	Two Systems and Two planes . . . . .	175
5.3	The Management Plane Control Point (mpCP) . . . . .	181
5.3.1	Introduction . . . . .	181
5.3.2	Managed Objects in mpCP . . . . .	184
5.3.3	Connectivity Structures for mpCP . . . . .	186
5.3.4	The mpCP Protocol and Spontaneous Events . . . . .	189
5.4	The Management System . . . . .	192
5.4.1	Introduction . . . . .	192
5.4.2	The TMN Management System . . . . .	194
5.4.3	The SNMP Management System . . . . .	200
5.5	Using AMLn Models in Management Systems . . . . .	202
5.6	Summary . . . . .	205

## 6 Applying AMLn

6.1	Introduction . . . . .	209
6.2	OSI Upper-Layer Architecture . . . . .	214
6.2.1	Introduction . . . . .	214
6.2.2	ACSE, the Association Control Service Element . . . . .	217
6.2.3	ROSE, the Remote Operation Service Element . . . . .	219
6.3	TCAP, the Transaction Capability Application Part in SS7 . . . . .	222
6.4	ATM Cell Switching . . . . .	230
6.4.1	Introduction . . . . .	230
6.4.2	ATM in B-ISDN . . . . .	231
6.4.3	The ATM Stratum . . . . .	233
6.4.4	The Adaptation Stratum . . . . .	238

<b>Appendix A: List of Acronyms and Standards</b>	243
<b>Appendix B: SAG and SAC Operations</b>	249
<b>Appendix C: AMLn Configuration Parameters and Tables</b>	259
<b>Appendix D: AMLs and AMLp in Short</b>	265
<b>References</b>	275
<b>Index</b>	277
