

Contents

1 Preliminaries.....	1
1.1 Summary.....	1
1.2 The Problem of Knowledge and Technology Creation Versus the Problem of Their Justification and Verification.....	2
1.3 Short Review of the History of Knowledge Justification and Verification Approaches.....	4
1.4 New Approaches to the Problem of Knowledge and Technology Creation	9
1.5 The Challenge of New Informational and Knowledge Civilization Era	12
1.6 The Need of a New Understanding of the World.....	15
1.7 The Challenge to Epistemology	21
1.8 The Contents of this Book and Related Issues.....	22
Part I: Models of Creative Processes	
2. <i>Rational Theory of Intuition</i> and Its Epistemological Consequences.....	27
2.1 Summary.....	27
2.2 Rationality versus Intuition	27
2.3 The Relative Complexity of Processing Visual and Verbal Information	32
2.4 The Dual Thought Experiment	34
2.5 The Evolutionary Rational Definition of Intuition	36
2.6 First Validation Tests of the Rational Theory of Intuition	37
2.7 The Role of Language and Tradition in the Evolution of Human Civilization	40
2.8 The Limitations of Language	42
2.9 The Civilization Heritage of Humanity and Its Constitutive Parts	43
2.10 Ontological and Epistemological Consequences	46
2.11 The Problem of Truth and Objectivity	48
2.12 The Problem of Creativity	51
2.13 Intuitive Decisions	53
2.14 Creative Intuitive Processes	55
2.15 Relations to Far East Philosophy and to Psychology of Subconscious and Unconscious	56
2.16 Practical Aspects of Intuition	57

3 Basic Dimensions of <i>Creative Space</i>	59
3.1 Summary	59
3.2 The Concepts of Knowledge and Technology	60
3.3 SECI Spiral	68
3.4 The Concept of Creative Space	75
3.5 Basic Transitions in Creative Space	79
3.6 New Spirals of Creative Processes	81
3.7 Conditions for Stimulating Scientific Debate and Final Remarks	87
4 Further Dimensions of <i>Creative Space</i>	91
4.1 Summary	91
4.2 Pentagram System	92
4.3 Imagination	95
4.4 Intervention	98
4.5 Integration	100
4.6 Pentagram System, Shinayakana Systems Approach and Critical Systems Thinking	103
4.7 Basic versus Applied Research	107
4.8 Constructivist versus Objectivist View of Reality	109
4.9 Hermeneutic Reflection and Triple Helix of Normal Knowledge Creation	115
4.10 Cross-Cultural and Organizational Knowledge Creation.....	118
4.11 Dimensions of <i>Creative Space</i> : Concluding Remarks	122
Part II: Issues of Knowledge Civilization Age	
5 A Vision of New Civilization Era.....	127
5.1 Summary	127
5.2 The Importance of Vision on the Verge of a New Civilization Era	127
5.3 Concepts and Ideas Leading to the Cultural Platform of the New Civilization Era.....	129
5.4 Current Perceptions of the Nature of the New Era	137
5.5 The Vision: What Problems of Humanity Should We Solve?	139
5.6 Main Megatrends of the New Era	142
5.7 Impacts of Digital and Network Technology	147
5.8 Change in Economic Behavior and in Economics	150
5.9 Change in Social Behavior and in Sociology	152
5.10 Main Conflicts of the Coming Era	156
5.11 Main Stages of the Coming Era and Our Essential Obligations	157
6 A New Role of Systems Science: <i>Informed Systems Approach</i>	161
6.1 Summary	161
6.2 The Diversity of Systemic Approaches	162
6.3 Soft Perspective of the History of Systems Science; Theorizing Systems Methodologies Across Cultures	169

	Soft Versus Hard Systems Thinking	171
	Critical Systems Thinking/Critical Systems Practice (CST/CSP)	172
	Unbounded Systems Thinking (UST).....	176
	The Oriental Perspective: Shinayakana and WSR	179
6.4	Hard Perspective of the History of Systems Science	184
	Computer Science, Logics and Computer Intelligence	185
	Dynamic Systems, Chaos and Complexity Theory	189
	Operational Research and Optimization	192
	Modeling, Computational Science, Decision Support, Computer-Man Interaction	196
6.5	Synergy and Emergence	199
6.6	A New Definition of Systems Science	203
6.7	Three Principles of Integrated Perspective and Fields of Knowledge Related to the New Paradigm	205
6.8	The New Challenge: Intercultural Synthesis	210
6.9	Conclusions: Informed, Creative Systemic Approach	214
 Part III: Towards Knowledge and Technology Creation Support		
7	Decision Support versus Knowledge Creation Support	219
7.1	Summary.....	219
7.2	Decision Automation versus Computerized Decision Support	220
7.3	The Meaning and History of Decision Support	222
7.4	Current Status of Decision Support	229
7.5	The Difference and Similarities Between Decision Support and Creativity Support	234
7.6	Key Objects for Creativity Support.....	235
7.7	The Concept of a Creative Environment	243
7.8	Existing and Needed Creative Environments	244
	Web Knowledge Acquisition	245
	Debating	246
	Experiment Design and Support	246
	Virtual Laboratories.....	247
	Road-mapping	247
	Brainstorming	248
	Gaming	248
	Distance Learning and Teaching	249
7.9	Concluding Comments	249
8	Conclusions	251
	References	263
	Index	281
