Chapter 1

Repair of Involutional Ectropion and Entropion: Transconjunctival Surgery of the Lower Lid Retractors

Markus J. Pfeiffer

1.1	Introduction	1
1.2	Surgical Anatomy of the Lower Lid	1
1.2.1	Lower Lid Position and the Intercanthal Line	2
1.2.2	Posterior Lamella of the Lower Lid	2
1.2.3	Anterior Lamella of the Lower Lid	2
1.2.4	Relationship Between the Anterior and Posterior Lamellae	2
1.2.5	Lower Lid Crease	4
1.2.6	Orbital Septum and the Orbitomalar Septum	4
1.2.7	Lid Margin Shape and the Lid Margin Angle at the Lacrimal Punctum	4
1.3	Preoperative Evaluation and Surgical Planning	4
1.3.1	Evaluation of the Intercanthal Line	5
1.3.2	Evaluation of the anterior and posterior Surface	5
1.3.3	Evaluation of the Three Vectors Influencing Lid Function	5
1.3.4	Evaluation of the Lid Margin and the Punctum	5
1.4	Surgical Technique for Ectropion Repair	6
1.4.1	Principle of Retractor Fixation	6
1.4.2	Access to the Medial Retractors	6
1.4.3	Access to the Central Retractors	7

1.4.4	Exposure of the Inferior Tarsal Border	7
1.4.5	Suture Technique	7
1.4.6	Correction of Horizontal Laxity	9
1.5	Surgical Technique for Entropion Repair	10
1.5.1	Principle of Retractor Fixation	10
1.5.2	Access to the Lower Lid Retractors	10
1.5.3	Suture Technique	10
1.6	Repair of Complicated Cases and Complications of Retractor Surgery	10
1.6.1	Complicated Involutional Ectropion	10
1.6.2	Complicated Involutional Entropion	10
1.6.3	Complications of Retractor Surgery	12

Chapter 2

Update on Mohs Micrographic Surgery Techniques for Excision and Reconstruction of Periocular Tumors: A Multidisciplinary Approach

Christopher J. Miller, William R. Katowitz

2.1	Introduction	14
2.1.1	Role of Mohs Micrographic Surgery in Treating the Patient with Periocular Malignancy	14
2.1.2	History of Mohs Micrographic Surgery in the Treatment of Periocular Malignancies	14
2.1.3	Clarification of the Meaning of Clinical, Surgical, and Pathologic Margins	14
2.2	Steps of Mohs Micrographic Surgery	15

3.9	Preoperative Medication	50
3.10	Surgical Recession: Posterior Approach	51
3.11	Surgical Recession: Anterior Approach	54
3.11.1	Levator Disinsertion/ Mullerectomy	54
3.11.2	Graded Full-Thickness Anterior Blepharotomy	54
3.12	Conclusion	58

Chapter 4

Lower Eyelid Retraction: Current Concepts in Management

Scott M. Goldstein

4.1	Introduction	61
4.2	Over-action of the Upper Lid Retractors	61
4.3	Facial Palsy and Lid Retraction	62
4.4	Lower Lid Retraction	63
4.5	Nonsurgical Approaches	64
4.6	Surgical Approaches	66
4.7	Recession of Retractors	66
4.8	Spacer Graft	67
4.9	Midface Surgery	68
4.10	Lateral Tarsal Strip	70

Chapter 5

Surgical Orbital Anatomy

A. Ducasse

5.1	Introduction	73
5.2	Bony Orbit	73
5.2.1	Embryology	74
5.2.2	Dimensions of the Orbit	74
5.2.3	Description	74
5.2.3.1	Upper Orbital Wall	74
5.2.3.2	Lateral Orbital Wall	74
5.2.3.3	Inferior Orbital Wall	74
5.2.3.4	Medial Orbital Wall	75
5.2.4	Orbital Margins or Angles	75
5.2.4.1	Superior and Medial Margin	75
5.2.4.2	Inferior and Medial Margin	75
5.2.4.3	Superior and Lateral Margin	76
5.2.4.4	Inferior and Lateral Margin	76
5.2.5	Orbital Rim	76
5.2.6	Orbital Apex	76

5.3	Orbital Periosteum	77
5.4	Orbital Contents	77
5.4.1	Eyeball	78
5.4.2	Optic Nerve	78
5.4.3	Orbital Muscles	78
5.4.3.1	Levator Muscle of the Upper Eyelid (Levator Palpebrae Superioris Muscle)	78
5.4.3.2	Oculomotor Muscles	79
5.4.3.3	Supernumerary Muscles	80
5.4.4	Muscular Fascias	80
5.4.5	Main Lacrimal Gland	81
5.4.6	Orbital Arteries	81
5.4.6.1	Ophthalmic Artery	81
5.4.6.2	Infraorbital Artery	88
5.4.6.3	Anastomosis Between the Two Carotid Systems	88
5.4.7	Orbital Veins	89
5.4.7.1	Superior Ophthalmic Vein	89
5.4.7.2	Inferior Ophthalmic Vein	89
5.4.7.3	Medial Ophthalmic Vein	89
5.4.7.4	Organization of Orbital Venous Drainage	90
5.4.8	Orbital Lymphatics	90
5.4.9	Orbital Nerves	90
5.4.9.1	Intraorbital Oculomotor Nerves	91
5.4.9.2	Intraorbital Branches of the Trigeminal Nerve	91
5.4.9.3	Ciliary Ganglion	92
5.4.10	Orbital Fat	93
5.5	Anatomical Orbital Topography	93
5.5.1	Intraconal Space	93
5.5.2	Superior Extraconal Space	94
5.5.3	Lateral Extraconal Space	94
5.5.4	Inferior Extraconal Space	94
5.5.5	Medial Extraconal Space	95
5.6	Conclusions	95

Chapter 6

Periocular Capillary Hemangioma: New Concepts in Natural History and Response to Glucocorticoids

David H. Verity, Geoffrey E. Rose

6.1	Introduction	100
6.1.1	Etiology	100
6.1.2	Investigation	100

6.1.3 Management 102

6.2 New Insights into the Natural History of Periorbital Capillary Hemangiomas 103

6.2.1 How Long and How Significant is the Growth Phase of Capillary Hemangiomas? 103

6.2.2 What is the Nature of Involution for Capillary Hemangiomas? 104

6.2.3 Do Capillary Hemangiomas Undergo Complete Involution? 106

6.3 Changes in Capillary Hemangiomas After Local Steroid Therapy 107

6.3.1 Hemangioma Characteristics Associated with Need for Intervention 107

6.3.2 Involutional Changes in Volume and Velocity After Steroid Therapy 107

6.4 Conclusion 108

Chapter 7
Venous-lymphatic Malformations (Lymphangioma) of the Orbit: Diagnostic and Therapeutic Challenges

William R. Katowitz, Michael Kazim

7.1 Introduction 113

7.2 Classification 113

7.3 Imaging 116

7.3.1 Magnetic resonance imaging 116

7.3.2 Computed Tomography 116

7.4 Histology 116

7.5 Treatment 117

7.5.1 Treatment Overview 117

7.5.2 Systemic Steroids 117

7.5.3 Surgery 117

7.5.4 Laser Treatment 117

7.5.5 Sclerotherapy 117

7.5.5.1 OK-432 118

7.5.5.2 Sodium Morrhuate 118

7.5.5.3 Other Agents 119

7.5.5.4 Image-guided Sclerotherapy 119

7.6 Future Treatment Modalities 119

Chapter 8
Thyroid-related Orbitopathy: New Immunologic Concepts and Future Implications

Raymond S. Douglas, Terry J. Smith

8.1 Introduction 123

8.2 Immunologic Characterization of Disease Stages 123

8.2.1 Inflammation and Hyaluronan Accumulation 123

8.2.2 Resolution of Inflammation 124

8.3 Autoimmune Target Epitopes 124

8.3.1 Thyrotropin Receptor 124

8.3.2 Insulin-like Growth Factor-1 Receptor 125

8.3.3 Additional Autoantigens ... 125

8.4 Central Role of Orbital Fibroblasts 126

8.4.1 Inflammation 126

8.4.2 Extracellular Matrix and Volume Expansion 127

8.4.3 Surface Molecule Expression 127

8.4.4 Unique Capacity to Differentiate 128

8.5 Impact of Environmental and Genetic Factors 129

8.5.1 Genetics 129

8.5.2 Environment 129

8.6 Therapeutic Implications .. 130

8.6.1 Immune Subset Depletion 130

8.6.2 Cytokine Therapies 131

Chapter 9
Decompression Surgery for Thyroid-Related Orbitopathy: Status of the Art and Unresolved Issues

Lelio Baldeschi

9.1 Introduction 144

9.2 Orbital Decompression:
No Technique Fits All 144

9.3 State of the Art
and Unresolved Issues 145

9.3.1 Decompression
for Functional Reasons 145

9.3.2 Decompression
for Rehabilitative
Cosmetic/Psychosocial,
and Symptomatic Reasons 147

9.3.2.1 Why Rehabilitative
Surgery? 147

9.3.2.2 Rehabilitative
Decompression Surgery ... 147

Chapter 10
Orbital Volume Augmentation
with Injectable Self-inflating
Hydrogel Pellet Expanders:
A Minimally Invasive Approach

Michael P. Schittkowski,
Rudolf F. Guthoff

10.1 Introduction 153

10.2 Compensation for Orbital
Volume Deficiency
in Congenital Disease 154

10.2.1 Congenital Blind
Microphthalmos 154

10.2.1.1 Symptoms 154

10.2.1.2 Method 155

10.2.1.3 Results 156

10.2.2 Congenital Clinical
Anophthalmos 159

10.2.3 Side Effects 160

10.3 Compensation for Orbital
Volume Deficiency
in Acquired Disease 160

10.3.1 Acquired Anophthalmic
Enophthalmos 160

10.3.1.1 Patients 160

10.3.1.2 Method 160

10.3.1.3 Results 161

10.3.2 Acquired Enophthalmos
Due to Phthisis
of the Globe 161

10.3.3 Side Effects 161

10.4 Discussion 163

10.4.1 Congenital
Microphthalmos 163

10.4.2 Acquired Anophthalmos ... 165

10.4.3 Volume Calculation 166

10.4.4 Possible Risks 167

Chapter 11
Hydroxyapatite Orbital
Implant Exposure: Symptoms,
Physiopathology, Treatment

J.P. Adenis, M.P. Boncoeur Martel,
P.Y. Robert

11.1 Introduction 171

11.2 Diagnosis
and Physiopathology 172

11.3 Treatment 174

11.3.1.1 Autologous Grafts 174

11.3.2 Surgical Techniques
for Muller’s Muscle Flap ... 174

11.3.2.1 Conjunctiva–Muller’s Muscle
Flap Technique 1 174

11.3.2.2 Conjunctiva–Muller’s Muscle
Flap Technique 2 174

11.3.2.3 The Tarsoconjunctival
Pedicle Flap 177

11.3.3 Removal and Replacement
of the Implant 177

11.4 Indications 177

11.5 Discussion 178

11.6 Conclusion 178

Chapter 12
Dermis Fat Implants

Christoph R. Hintschich

12.1 Introduction 181

12.2 History 181

12.3 Principle 182

12.4 Surgical Procedure 182

12.4.1 Primary DFG 182

12.4.2 Secondary DFG 184

12.5 Results 185

12.6 Complications 186

12.6.1 DFG Placement
in the Upper Eyelid 187

12.7 Indications 187

12.7.1 Primary Dermis Fat
Transplantation 187

12.7.2 Secondary Dermis Fat
Transplantation 189

12.8 Essential Concepts 191

12.8.1 Size of the Dermofat Graft .. 191
 12.8.2 Shape of the Dermofat Graft 191
 12.8.3 Donor Site 191
 12.8.4 Avoid Placement of DFG onto Alloplastic Implants ... 191
 12.8.5 Avoid Compressing the DFG with Orbital Insertion 191
 12.8.6 Avoid Dissection to Expose Extraocular Muscles 191
 12.8.7 Fornices 191
 12.8.8 Motility 192
 12.8.9 Rehabilitation Following DFG Implantation 192
 12.9 Conclusion 192

**Chapter 13
 Rehabilitation
 of the Exenterated Orbit**

Giulio Bonavolontà, Adriana Iuliano,
 Diego Strianese

13.1 Introduction 196
 13.1.1 Basics 196
 13.1.2 Indications 196
 13.2 Rehabilitation 196
 13.2.1 Temporalis Muscle Transposition 197
 13.2.2 Frontalis Muscle Transfer .. 197
 13.2.3 Midline Forehead Flap 199
 13.2.4 Oculofacial Prostheses 201
 13.3 Clinical Experience with the Described Technique 203
 13.3.1 Temporalis Muscle Transposition 203
 13.3.2 Frontalis Muscle Transfer ... 203
 13.3.3 Midline Forehead Flap 204
 13.3.4 Oculofacial Prostheses 204

**Chapter 14
 Salivary Gland Transplantation**

Gerd Geerling, Peter Sieg, Peter Raus

14.1 Introduction 208
 14.1.1 Background and Surgical Principles 208
 14.1.2. Quantitative and Compositional Differences Between Saliva and Normal Tears 209

14.2 Minor Labial Salivary Gland Transplantation 210
 14.2.1 Surgical Technique 210
 14.2.2 Clinical Results 211
 14.3 Parotid Duct Transposition 212
 14.3.1 Surgical Technique 212
 14.3.2 Clinical Results 212
 14.4 Sublingual Gland Transposition 212
 14.4.1 Surgical Technique 213
 14.4.2 Clinical Results 213
 14.5 Submandibular Gland Transposition 213
 14.5.1 Surgical Technique 213
 14.5.2 Clinical Results 213
 14.5.3 Late Complications 214
 14.6 Conclusion 217

**Chapter 15
 Recent Developments
 in the Diagnosis and Management
 of Congenital Lacrimal Stenosis**

K.-H. Emmerich, H.-W. Meyer-Rüsenberg

15.1 Anatomy and Embryology 219
 15.1.1 Anatomy of the Lacrimal System 219
 15.1.2 Lacrimal System Variations 219
 15.1.3 Congenital Atresia 220
 15.1.4 Variations in Canalization .. 220
 15.2 Diagnosis and Examination 220
 15.3 Congenital Nasolacrimal Duct Obstruction 221
 15.3.1 Etiology 221
 15.3.2 Differential Diagnosis of CNLDO 221
 15.3.3 Treatment of CNLDO 222
 15.3.3.1 Procedures, Probing, and Irrigation 222
 15.3.3.2 Intubation of the Lacrimal System 222
 15.4 Acute Dacryocystitis 223
 15.4.1 Clinical Symptoms 223
 15.4.2 Therapy 223
 15.4.2.1 Conservative Management 223
 15.4.2.2 Incision 224
 15.4.2.3 Intubation of the Lacrimal System 224
 15.5.1 Dacryocystorhinostomy in Children 224

15.5.2 Endocanalicular
Microendoscopic
Procedures 224

15.6 Removal of Silicone Tubing 225

15.7 Congenital Dacryocoele 225

15.8 Fistulas of the Lacrimal
System 225

Chapter 16
Cosmetic Rejuvenation
of the Lower Face and Neck

Alan B. Brackup, Ari D. Abel

16.1. Introduction 229

16.1.1 Basics 229

16.2 Pathophysiology of Lower
Face and Neck Aging 229

16.2.1 Basics 229

16.2.2 Skin 229

16.2.3 Subcutaneous Soft Tissue
Loss 230

16.2.4 Loss of Ligamentous
Support and Fat Deposition 231

16.3 Preoperative Analysis
of the Lower Face and Neck 232

16.3.1 Photographic Analysis 232

16.3.2 Skin 232

16.3.3 Malar Region 232

16.3.4 Jowls 232

16.3.5 Buccal Fat 232

16.3.6 Chin 232

16.3.7 Neck 233

16.4. Procedure Selection 234

16.4.1 Tumescent Infiltration 234

16.4.2 Limited Procedures 234

16.4.2.1 Neck Liposuction 234

16.4.2.2 Chin Augmentation 235

16.4.2.3 Platysmaplasty 235

16.4.3 Face-lift Surgery 239

16.4.3.1 Basics 239

16.4.3.2 Alternative SMAS
Approaches 239

16.4.3.3 S-Lifts 241

16.4.3.4 S-Lift with SMAsectomy ... 241

16.4.3.5 Face-lift with Soft Tissue
Augmentation 241

16.4.4 Autologous Fat Transfer 241

Chapter 17
Facial Sculpting
with Injectable Filler Materials

Jean Carruthers, Femida Kherani,
Alastair Carruthers

17.1 Introduction 247

17.2 Facial Sculpting
with Injectable Fillers 248

17.3 Temporary Filling Agents .. 248

17.3.1 Hyaluronans 248

17.3.2 Collagen 248

17.3.3 Autologous Fat 251

17.3.4 Poly-L-lactic Acid Implants 251

17.4 Permanent and Semi-
permanent Injectable
Agents 251

17.4.1 DermaLive/DermaDeep 252

17.4.2 Calcium Hydroxyapatite
Beads 252

17.4.3 Polyalkylimide 253

17.4.4 Polymethylmethacrylate
Microspheres 253

17.5 Combination Therapy:
Botulinum Toxin and Fillers 255

Chapter 18
Overview of Skin Resurfacing
Modalities

Suzan Obagi, Meena Chaudhary-Patel

18.1 Introduction 259

18.2 Indications 259

18.3 Pathophysiology of Aging 260

18.4 Patient Assessment 260

18.5 History and Physical 260

18.6 Principles of Resurfacing ... 262

18.6.1 Pre-resurfacing Skin Care .. 263

18.6.2 Post-resurfacing Skin Care 264

18.6.2.1 Chemical Peels 264

18.6.3 Fractional
Photothermolysis 269

18.6.4 Dermabrasion 270

18.6.4.1 Dermabrasion Endpoints ... 270

18.6.4.2 Complications of Skin
Resurfacing 271

18.7 Conclusion 272

Subject Index 277
