<b>Preface</b> .....	vii
----------------------	-----

---

## **Part I. Riemannian Holonomy Groups and Calibrated Geometry**

*Dominic Joyce*

---

1 Introduction .....	3
2 Introduction to Holonomy Groups .....	4
3 Berger's Classification of Holonomy Groups .....	10
4 Kähler Geometry and Holonomy .....	14
5 The Calabi Conjecture .....	20
6 The Exceptional Holonomy Groups .....	26
7 Introduction to Calibrated Geometry .....	31
8 Calibrated Submanifolds in $\mathbb{R}^n$ .....	36
9 Constructions of SL $m$ -folds in $\mathbb{C}^m$ .....	41
10 Compact Calibrated Submanifolds .....	50
11 Singularities of Special Lagrangian $m$ -folds .....	57
12 The SYZ Conjecture, and SL Fibrations .....	63

---

## **Part II. Calabi–Yau Manifolds and Mirror Symmetry**

*Mark Gross*

---

13 Introduction .....	71
14 The Classical Geometry of Calabi–Yau Manifolds .....	72
15 Kähler Moduli and Gromov–Witten Invariants .....	93
16 Variation and Degeneration of Hodge Structures .....	102
17 A Mirror Conjecture .....	121
18 Mirror Symmetry in Practice .....	122
19 The Strominger–Yau–Zaslow Approach to Mirror Symmetry .....	140

---

## **Part III. Compact Hyperkähler Manifolds**

*Daniel Huybrechts*

---

20 Introduction .....	163
21 Holomorphic Symplectic Manifolds .....	164
22 Deformations of Complex Structures .....	172
23 The Beauville–Bogomolov Form .....	177
24 Cohomology of Compact Hyperkähler Manifolds .....	190
25 Twistor Space and Moduli Space .....	196

26	Projectivity of Hyperkähler Manifolds .....	203
27	Birational Hyperkähler Manifolds .....	213
28	The (Birational) Kähler Cone .....	221
	<b>References</b> .....	226
	<b>Index</b> .....	237
