

Contents

A. Aim and Scope of the Study	1
B. International Climate Policy in a Globalizing World	6
I. The Economics of Climate Change	8
1. Climate Change as an Issue	10
2. International Climate Policy	18
3. The International Economics of Climate Change	23
II. International Climate Policy	29
1. The Role of International Trade in Goods	32
2. The Role of International Capital Mobility	37
C. International Trade in Goods and International Capital Mobility	48
I. Interdependencies of International Goods Markets and International Capital Markets in an Integrated World	49
1. The Analytical Framework	51
2. The Relationship between International Trade in Goods and International Capital Mobility in a General Equilibrium Setting	64
II. The Case of Endogenous Goods and Capital Flows	67
1. Relative Factor Endowments	68
2. Different Preferences	71
3. Different Technologies	72
4. Production and Consumption Distortions	83
5. International Capital Movements with Sector-Specific Capital	87
III. Implementation of Capital Mobility into a CGE Framework —Some Conclusions	89
IV. Appendix: Stability of the World Equilibrium with Free Goods Trade and International Capital Mobility	91

D. International Climate Policy and International Trade in Goods: A Recursive Dynamic General Equilibrium Model	97
I. Theoretical Model	97
1. The Desired Model Structure	98
2. The Basic Model	98
3. Single-Period Equilibrium	104
4. Dynamics	128
II. Benchmarking of the Dynamic Model	132
1. The Solution Concept	133
2. Calibration of the Single-Period Equilibrium	134
3. Benchmarking of Regional Growth Paths	137
4. Results of the Benchmark Run from 1993 up to 2030	144
III. International Climate Policy Evaluation	147
1. CO ₂ Emissions	148
2. International Climate Policy and Trade in Goods	150
IV. Sensitivity Analysis	157
1. Supply Elasticities for Fossil Energy	157
2. Armington Elasticities	158
3. Alternative Growth Paths of Nations	161
V. Concluding Remarks	164
VI. Appendix: Model Dimensions, Data, and Production Structure	168
E. International Climate Policy in a Globalizing World: The Implications of International Capital Mobility and Trade Interactions	193
I. International Trade and Capital Mobility: Theoretical Implications	195
II. Integrating International Capital Mobility into the CGE Framework	197
1. Perfect Capital Mobility	198
2. Imperfect Capital Mobility	199
III. Parameterization and Calibration of International Capital Mobility	211
IV. Benchmark Runs for Different Forms of Capital Market Integration	215

1. The Impact on Regional Growth Paths	216
2. The Impact on Competition Patterns	230
3. The Relationship between International Capital Flows and Commodity Trade in the Benchmark	233
V. International Climate Policy Analysis with Different Degrees of Capital Market Integration	241
1. Welfare Effects and International Capital Flows	242
2. Sectoral Reallocation	247
3. CO ₂ Emission Leakage	253
4. Shadow Prices of Emission Constraints	254
5. The Interaction of Trade and International Capital Flows	256
VI. Sensitivity Analysis	265
VII. Summary of Simulation Results and Policy Conclusion	269
F. Summary	274
