Contents

Preface.....v

List of Figures.....xxiii

List of Tables.....xxix

1 The Estimation Challenges.....1

1.1 The Basics of Software Estimation.....8
1.1.1 Measurement.....9
1.1.2 Estimation.....13
1.1.3 Estimation Precision.....16
1.1.4 The Object of Estimation.....20
1.1.5 Requirements (Scope) Creep.....22
1.1.6 Measurement and Estimation.....25
1.1.7 Measurement of Effort.....24
1.1.8 Documentation.....27
1.1.9 The Problem of Historic Data.....28
1.2 Rules for Estimation.....29
1.2.1 Basic Principles.....29
1.2.2 Do's and Don'ts When Estimating.....30
1.2.3 Estimation Errors.....31
1.2.4 Political Estimates.....32
1.2.5 Underestimation and Overestimation.....33
1.2.6 The Estimation Conference.....36
1.2.7 Estimation Honesty.....36
1.2.8 Estimation Culture.....37
1.2.9 Training for Estimation.....38
1.3 A Checklist for Estimating.....38
1.4 Internet Links for Software Measurement Associations and Estimation.....39
1.5 Management Summary.....41

2 Estimation Fundamentals.....45

2.1 Estimation in a Project Controlling Environment.....46
2.1.1 Adjusting the Estimate to Take into Account Project Environment Factors.....47
2.1.2 Project Goals and the Devils Square of Project Management.....49
2.1.3 Estimation and Quality.....50

2.1.4 ISO/IEC 9126 Quality Attributes and IFPUG GSC…….. 51
2.1.5 The Cybernetic Estimation Control Circuit……... 53
2.2 Determining Parameters of Estimation……56
2.2.1 The Purpose of Estimation…….57
2.2.2 The Goals of Estimation…… 58
2.2.3 The Right Time for Estimation……..58
2.2.4 Tracking of Estimates…… 61
2.3 Management Summary…… 62

3 Prerequisites for Estimation…… 65

3.1 The Information Basis of Estimation……... 65
3.1.1 Prerequisites for Estimation……... 65
3.1.2 Prerequisites for Estimation of Effort…… 66
3.1.3 Time Accounting……68
3.1.4 The Problem of Overtime Work…… 70
3.1.5 The Definition of the Application Boundary……. 70
3.1.6 The Type of Estimation…… 71
3.1.7 Customizing of Standard Software (Packages)…… 72
3.1.8 Documentation of the Development Environment…… 74
3.1.9 Validation of Estimates……..76
3.2 The Process of Estimation……76
3.2.1 Distribution of Estimated Effort Across Project Phases… 77
3.2.2 The Documentation of Project Estimates……...77
3.3 Management Summary…… 80

4 The Implementation of Estimation…… 85

4.1 Report About a Successful Implementation…….87
4.2 Positive and Negative Aspects of Software Measurement…….. 90
4.3 Frequently Asked Questions…… 93
4.3.1 The Effort for Estimation……... 93
4.3.2 The Right Time to Implement a Formal Estimation Process……... 94
4.3.3 The Pros and Cons of a Competence Center……..95
4.4 Acceptance Challenges…… 98
4.4.1 Counter the Counterarguments…….. 98
4.4.2 Resistance…… 101
4.4.3 Information and Participation……. 105
4.5 Goals for an Estimation Process…… 107
4.6 Counting of Historical Projects……..109
4.7 Estimation as an Early Warning System……110
4.8 Management Summary…….. 112

5 Estimation Methods……117

5.1 The Challenges of Estimation Methods……118
5.2 Determination of the Effort……126
5.2.1 Estimation Based on an Experience Curve…….. 126
5.2.2 Estimation Using an Estimation Equation……....127
5.2.3 Estimation with an Expert System……... 129
5.2.4 Backfiring……132
5.3 Overview of Methods……137
5.3.1 Heuristic Methods…… 137
5.3.2 Size-Based Methods……143
5.4 Evaluation of an Estimation Method……147
5.4.1 User Comfort……148
5.4.2 Project Management……149
5.4.3 Quality of Result…….. 150
5.4.4 Precision of Estimation Methods…… 151
5.5 Management Summary…….. 154

6 Estimating Maintenance Effort…… 159

6.1 International Standards for Software Maintenance……160
6.1.1 ISO/IEC standards……160
6.1.2 FiSMA: Finnish Software Measurement Association…..160
6.1.3 IFPUG: International Function Point Users Group……..160
6.1.4 NESMA: Netherlands Software Metrieken Gebruikers Associatie……. 163
6.1.5 UKSMA: United Kingdom Software Metrics Association……...163
6.2 Enhancement Projects…… 164
6.3 Software Metrics for Maintenance……167
6.4 Estimation of Maintenance Effort after Delivery……...169
6.5 Estimation of Small Changes.....……170
6.6 Management Summary…….. 176

7 Software Measurement and Metrics: Fundamentals…….. 179

7.1 Terminology……...180
7.1.1 Formal Definitions……...180
7.1.2 Basic Measures (Measures)…… 182
7.1.3 Metrics…… 182
7.1.4 Indicators……..183
7.1.5 Metrics……..185

7.2 Goals and Benefits of Metrics……187
7.2.1 Goals of Metrics……...187
7.2.2 Benefits of Metrics……...188
7.3 Start and Implementation of a Metrics Initiative……... 190
7.3.1 Establishing a Metrics Initiative……...191
7.3.2 Establishing a Metrics Database…….. 196
7.3.3 The Structure of a Metrics System……...198
7.4 Management Summary…….. 203

8 Product- and Process-Metrics…….. 207

8.1 Product Metrics……..208
8.1.1 Size of the Software Product……..…208
8.1.2 Source Code Metrics……..…209
8.1.3 Source Lines of Code……...210
8.1.4 Functional Size……..…211
8.1.5 Project Size Categories……..…213
8.2 Software Quality ……... 215
8.2.1 Defect Metrics……..217
8.2.2 Function Points and Defects…….. 220
8.3 Documentation…….. 222
8.4 System Complexity……..…222
8.4.1 Structural and Data Complexity……...223
8.4.2 Halstead's Metrics……..…223
8.4.3 McCabe's Cyclomatic Complexity……..…224
8.5 Process Metrics……..… 225
8.5.1 Work Effort……..226
8.5.2 Productivity……...…226
8.5.3 PDR……..229
8.5.4 Efficiency……..…231
8.5.5 Cost……..… 232
8.5.6 Project Duration……..…..235
8.6 Management Summary…….. 236

9 Object-Oriented Metrics…….…… 241

9.1 Examples of Object-Oriented Metrics…….... 243
9.1.1 Design metrics by Lorenz (1993)……244
9.1.2 The Metrics Suite from Chidamber and Kemerer, 1994…244
9.1.3 Capers Jones' Object-Oriented Cost, Defect, and Productivity Metrics……..245
9.1.4 The Survey of Xenos et al. ……..245
9.1.5 Metrics for Defects and Size by Cartwright and Shepperd……247

9.1.6 Methods for Size from Catherwood et al. ……... 247
9.1.7 Class Metrics from Silvia Regina Vergilio and Chaves……... 248
9.1.8 Use Case Points……248
9.1.9 Further Examples of Object-Oriented Measures and Metrics…….. 250
9.2 Projects that were Developed Using Object-Oriented Approaches in the ISBSG Benchmarking Database……..… 250
9.3 Function Points and Object-Oriented System Development……. 251
9.3.1 IFPUG Function Points and OOA According to the Jacobsen Approach…… 251
9.3.2 IFPUG Function Points and UML……... 252
9.3.3 COSMIC and UML……..253
9.4 Management Summary……..…… 254

10 Measurement Communities and Resources……. 257

10.1 The ISO Standards……258
10.2 The Capability Maturity Model Integration……...261
10.3 The Goal Question Metric Method……....264
10.4 The Balanced Scorecard…….....266
10.5 Important Software and Systems Measurement Organizations…. 268
10.5.1 Computer Measurement Group (CMG)……...269
10.5.2 COSMIC Consortium……..… 269
10.5.3 Finnish Software Measurement Association (FiSMA)… 271
10.5.4 German Metrics Organization: DASMA…….273
10.5.5 German GI Interest Group on Software Metrics……. 273
10.5.6 International Function Point Users Group (IFPUG)……274
10.5.7 International Software Benchmarking Standards Group……... 277
10.5.8 International Organization for Standardization……280
10.5.9 Metrics Association's International Network (MAIN)… 282
10.5.10 Software Engineering Institute at Carnegie Mellon University in Pittsburgh, PA, USA……... 283
10.5.11 Standard Performance Evaluation Corporation (SPEC).. 284
10.5.12 Transaction Processing Performance Council (TPC)….. 284
10.6 Internet Links to Measurement Communities……285
10.7 Management Summary……..… 286

11 Benchmarking of IT Projects……..…289

11.1 Benchmarking Fundamentals…….290
11.2 Practical Benchmarking Experiences…….……293
11.3 Benchmarking Databases……...…297

11.3.1 Academic Comparison of Measurement Databases……297
11.3.2 The ESA/INSEAD Database……... 297
11.4 ISBSG and Its Products……..…299
11.4.1 Demographics of ISBSG Repositories…….299
11.4.2 ISBSG Products……... 302
11.4.3 Project Characteristics……..304
11.4.4 Further Results of the ISBSG Research……...317
11.5 Internet Links to Benchmarking Organizations……..… 317
11.6 Management Summary…….. 318

12 The IFPUG Function Point Counting Method…….……323

12.1 Functional Size Measurement Methods History…… 325
12.2 The Benefits of the IFPUG FPM……... 326
12.2.1 Leveraging the Use of Function Points (and the Analytical Approach) in Software Development..... 327
12.2.2 Function Points as Part of a Pricing Evaluation Process…… 329
12.2.3 Function Points as the Basis for Contract Metrics……...330
12.3 Application Areas for Function Points……...332
12.4 The Evaluation of Function Point-Based Estimation Methods…..334
12.5 The Optimum Time to Count FPs……..336
12.6 The Process of Function Point Counting……... 338
12.6.1 Step 1: Define the Type of Count…… 339
12.6.2 Step 2: Define the Scope of the Count and the Application Boundary……. .341
12.6.3 Step 3: Count Unadjusted FPs…… 342
12.6.4 Step 4: Calculate the VAF After Determining the 14 GSCs…… 350
12.6.5 Step 5: Calculate the Adjusted FPs…….. 351
12.6.6 Step 6: Document the Count…… 353
12.6.7 Step 7: Quality Assurance of the Count by the Competence Center……... 355
12.7 The Process to Implement the IFPUG Function Point Counting Method……... 356
12.8 The Limitations of the IFPUG Function Point Counting Method……... 358
12.9 Management Summary…….. 359

13 Functional Size Measurement Methods (FSMMs)…….. 365

13.1 Short Characterizations of ISO/IEC-Conformant FSMMs…… 366
13.2 COSMIC ……... 367

13.2.1 The COSMIC Counting Process…….. 369
13.2.2 Software Layers in COSMIC……...371
13.2.3 ISBSG Data with Respect to COSMIC……374
13.2.4 Comparison Between Counts Done Using COSMIC and IFPUG FPA……...374
13.3 FiSMA 1.1 Functional Size Measurement Method…….. 376
13.3.1 The FiSMA 1.1 Measurement Process…… 379
13.3.2 FiSMA 1.1 Components ……...…. 380
13.3.3 Research Related to FiSMA 1.1 FSMM…….. 386
13.4 Mark II Function Point Method……. 387
13.5 NESMA FPA……. 389
13.5.1 Similarities and Differences Between NESMA and IFPUG Function Point Standards……..389
13.5.2 NESMA Function Points for Enhancements……... 392
13.6 Outlook for Functional Size Measurement Methods……. 393
13.7 Management Summary…….. 394

14 Variants of the IFPUG Function Point Counting Method……..397

14.1 The Data Point Method……..398
14.2 Feature Points……399
14.3 Object Point Methods……399
14.4 SPR Function Points…….. 400
14.5 3D Function Points……401
14.6 Use Case Points……..401
14.6.1 Unadjusted Use Case Weight (UUCW)……...402
14.6.2 Unadjusted Actor Weight (UAW)…….... 403
14.6.3 Unadjusted Use Case Points (UUCP)…….. 403
14.6.4 Technical Complexity Factor……...403
14.6.5 Environmental Complexity Factor……...403
14.6.6 Calculate Adjusted Use Case Points ……... 404
14.7 Outlook……...405
14.8 Management Summary…….. 406

15 Using Functional Size Measurement Methods……. 409

15.1 Function Point Prognosis……... 409
15.1.1 Function Point Proportions…….. 412
15.1.2 Other Early Function Point Proposals……. 414
15.1.3 IFPUG General Systems Characteristics (GSC)……..416
15.1.4 Benefits of Early Function Point Estimates……416
15.2 Estimation of Person Months of Work Effort Based on Function Points……. 417

15.3 Productivity Analysis……418
15.4 Typical Function Point Counting Experiences…….. 420
15.4.1 Business Functions Overview……. 421
15.4.2 Internal Logical Files (ILF)…… 421
15.4.3 External Interface Files (EIF)…….. 422
15.4.4 External Input (EI)……... 422
15.4.5 External Output (EO)……... 425
15.4.6 External Inquiries (EQ)…… 427
15.5 Management Summary…….. 429

16 Estimation of Data Warehouses, Web-Based Applications: Software Reuse and Redevelopment……433

16.1 Function Point Counts of Data Warehouse Projects……. 433
16.1.1 Experiences of Star Schema Design Function Point Counts…….. 434
16.1.2 Recommendations for Function Point Counting of OLAP Cube Design……. 436
16.2 Estimating Web Development……... 439
16.2.1 Enhancement of Existing Applications with Web Front-Ends…….. 440
16.2.2 New Development of Complete Web-Based Applications……. 441
16.2.3 Static Web Pages……. 442
16.2.4 Function Point Counts of Web Applications……... 443
16.2.5 Estimating Web Development with the CoBRA Method……. 446
16.2.6 The WEBMO Estimation Method……... 447
16.3 Software Reuse and Redevelopment……..448
16.4 Management Summary…….. 451

17 IFPUG Function Point Counting Rules…… 453

17.1 Overview of IFPUG CPM Release 4.2 (Also known as *IFPUG 4.2*)…….....453
17.2 Determine the Type of Count……..…455
17.3 Determine the Purpose and Scope of the Count and the Application (System) Boundary……456
17.4 Count Unadjusted FPs……457
17.4.1 Classification of the Data Function Types……...458
17.4.2 Classification of the Transaction Function Types……461
17.5 Calculate the Adjusted FPs……468
17.5.1 Determining the VAF……...469
17.5.2 The 14 GSCs…… 469

17.5.3 Calculation of the Adjusted Function Points……... 478
17.6 Management Summary……..… 481

18 Functional Size Measurement Case Studies……..…483

18.1 Case Study Description: Course Registration System……... 483
18.1.1 Logon……... 484
18.1.2 Maintain Professor Information……...484
18.1.3 Select/Deselect Courses to Teach…… 486
18.1.4 Maintain Student Information……..487
18.1.5 Register for Courses……..…488
18.1.6 Monitor for Course Full……... 490
18.1.7 Close Registration……....490
18.1.8 Submit Grades……..492
18.1.9 View Report Card…… 492
18.2 Use Case Diagram……..…493
18.2.1 Assumptions regarding the Use Cases.....……494
18.3 COSMIC (Cfp) Count of Course Registration system…….. 497
18.3.1 Identification of Layers……497
18.3.2 Identification of Users……..497
18.3.3 Application Boundary……..497
18.3.4 Identification of Triggering Events – Step 1……....498
18.3.5 Identification of Data Groups – Step 1…… 498
18.3.6 Identification of Functional Processes – Step 1……... 501
18.3.7 Identify Data Movements – Candidate Functional Processes – Step 1…… 502
18.4 FiSMA (Ffp) Count of Course Registration System…… 510
18.4.1 Step 1 and Step 2……..510
18.4.2 Step 3……....511
18.4.3 Step 4 ……...511
18.4.4 Steps 5–7…….. 511
18.4.5 KISS Quick…….. 512
18.4.6 FiSMA 1.1 Detailed Measurement……..… 514
18.5 IFPUG (FP) Count of Course Registration System……... 516
18.5.1 IFPUG Step 1: Determine the Type of Function Point Count……516
18.5.2 IFPUG Step 2: Identify the Counting Scope and Application Boundary……... 516
18.5.3 IFPUG Step 3: Count the Data Functions to Determine Their Contribution to the Unadjusted Function Point Count…….. 516
18.5.4 IFPUG Step 4: Count the Transactional Functions to Determine Their Contribution to the Unadjusted Function Point Count……... 519

18.5.5 IFPUG Summary Unadjusted FP Count for Course Registration System……. 522
18.6 Mark II Function Point Count of Course Registration System….. 523
18.7 NESMA Count of Course Registration System…….526
18.7.1 NESMA FP Count of Data Functions……..527
18.7.2 NESMA FP Count of Transactional Functions……... 528
18.8 Comparison of Results of FSM Methods…….. 530

19 Functional Size Measurement: Additional Case Studies…… 533

19.1 COSMIC Case Study……. 533
19.1.1 Valve Control System……..533
19.1.2 Measurement Viewpoint, Purpose, and Scope…….533
19.1.3 Requirements……... 534
19.1.4 COSMIC Measurement Procedure……..… 536
19.2 IFPUG Function Point Case Studies……..540
19.2.1 Function Point Calculator……... 540
19.2.2 Training Administration Application……..…….542

20 Tools for Estimation……... 547

20.1 The Benefits of Estimation Tools…….. 549
20.2 Effort Estimation Tools……..…550
20.3 The Use of Estimation Tools……. 552
20.3.1 A Survey About the Usage of Productivity Measurement Tools……..553
20.3.2 The Process of Estimating with Tool Support……. 553
20.4 Checkpoint for Windows (CKWIN)……..555
20.4.1 Early Estimates..... 556
20.4.2 Input: Hard Data…….. 558
20.4.3 Input: Soft Data……... 559
20.4.4 Estimation Modes…… 561
20.4.5 Estimation Results……562
20.4.6 Customizing and Calibrating the Software Tool……. 564
20.4.7 Simulations of Estimates with an Automated Tool…….565
20.4.8 Estimation Portfolios and Templates……...567
20.5 Experience® Pro Project Sizing, Estimating, and Scope Management Software……...573
20.5.1 Experience® Pro First Estimate……...573
20.5.2 Experience® Pro Improved Estimate…….. 574
20.5.3 Experience® Pro Final Review……576
20.5.4 Experience® Pro Project Portfolio Management…….576
20.5.5 Experience® Pro Application Maintenance Estimating..577

20.6 Other Estimation Tools……..577
20.7 Tools that Support Functional Size Measurement…….578
20.7.1 The Function Point Workbench (FPW)……...578
20.8 Tools for Object Oriented Metrics and Estimation……581
20.8.1 A Tool for Cost and Effort Estimation of OO Software Projects……581
20.8.2 Tools for Object Oriented Quality Metrics……..582
20.9 Website URLs for Estimation Tools…….. 584
20.10 Management Summary…….. 586

Appendix…….…….. 587

A.1 A Logbook for Function Point Counts……...587
A.2 Checklists…….... 589
A.3 Experience Situation Analysis Model MT22…….599

Literature...…….…….. 611

Index...…….…….....…….. 629
