
Contents

1 A Gauge-Invariant Theory of Intense-Field Coulomb Approximations to All Orders	
<i>Farhad H.M. Faisal</i>	1
2 Strong-Field Photoionization by Few-Cycle Laser Pulses	
<i>Gerhard G. Paulus</i>	17
3 Wavepacket Dynamics of Molecules in Intense Laser Fields	
<i>Hirohiko Kono, Katsunori Nakai, Manabu Kanno, Yukio Sato, Shiro Koseki, Tsuyoshi Kato, and Yuichi Fujimura</i>	41
4 Molecular Ion Beams Interrogated with Ultrashort Intense Laser Pulses	
<i>Itzik Ben-Itzhak</i>	67
5 Dynamical Reaction Theory for Vibrationally Highly Excited Molecules	
<i>Mikito Toda</i>	91
6 Relativistic Quantum Dynamics in Intense Laser Fields	
<i>Guido R. Mocken, Yousef I. Salamin, and Christoph H. Keitel</i>	113
7 Attosecond Scale Multi-XUV-Photon Processes	
<i>Dimitris Charalambidis, Paris Tzallas, Emmanouil P. Benis, and George D. Tsakiris</i>	133
8 Ultrashort Pulse Collapse in Quadratic Media	
<i>Jian Wu and Heping Zeng</i>	159
9 Femtosecond Laser Induced Various Luminescent Phenomena in Solid Materials	
<i>Jianrong Qiu, Li Wang, and Bin Zhu</i>	185

VIII Contents

10 Prospect of Laser-Driven X-Ray Lasers for Extension to Shorter Wavelengths <i>Yoshiaki Kato and Tetsuya Kawachi</i>	215
11 Femtosecond Laser Applications in Micro/Nano Science and Technology: Nonlinear Effects in Photonic Crystal Fibers, Femtosecond Laser-Induced Forward Transfer, and Femtosecond Laser Manipulation System for Biology <i>Ching-Yue Wang, Qi-Rong Xing, Yan-Feng Li, Ming-Lie Hu, Li Yang, Ji-Xian Gong, Wei Jia, and Lu Chai</i>	233
