Part I Survey of the European project GAIA II

| | |
|---|---|
| 1 The GAIA Project on Intersection and Implicitization | |
| <i>T. Dokken</i> | 5 |

Part II Some special algebraic surfaces

| | |
|---|----|
| 2 Some Covariants Related to Steiner Surfaces | |
| <i>F. Aries, E. Briand, C. Bruchou</i> | 31 |
| 3 Real Line Arrangements and Surfaces with Many Real Nodes | |
| <i>S. Breske, O. Labs, D. van Straten</i> | 47 |
| 4 Monoid Hypersurfaces | |
| <i>P. H. Johansen, M. Løberg, R. Piene</i> | 55 |
| 5 Canal Surfaces Defined by Quadratic Families of Spheres | |
| <i>R. Krasauskas, S. Zube</i> | 79 |
| 6 General Classification of (1,2) Parametric Surfaces in \mathbb{P}^3 | |
| <i>T.-H. Lê, A. Galligo</i> | 93 |

Part III Algorithms for geometric computing

| | |
|--|-----|
| 7 Curve Parametrization over Optimal Field Extensions Exploiting the Newton Polygon | |
| <i>T. Beck, J. Schicho</i> | 119 |
| 8 Ridges and Umbilics of Polynomial Parametric Surfaces | |
| <i>F. Cazals, J.-C. Faugère, M. Pouget, F. Rouillier</i> | 141 |

| | |
|---|-----|
| 9 Intersecting Biquadratic Bézier Surface Patches | |
| <i>S. Chau, M. Obereder, A. Galligo, B. Jüttler</i> | 161 |
| 10 Cube Decompositions by Eigenvectors of Quadratic Multivariate Splines | |
| <i>I. Ivrişimţiz, H.-P. Seidel</i> | 181 |
| 11 Subdivision Methods for the Topology of 2d and 3d Implicit Curves | |
| <i>C. Liang, B. Mourrain, J.-P. Pavone</i> | 199 |
| 12 Approximate Implicitization of Space Curves and of Surfaces of Revolution | |
| <i>M. Shalaby, B. Jüttler</i> | 215 |
| Index | 229 |
