## Contents – Volume XII

|           |   |    |
|-----------|---|----|
| <b>9</b>  | <b>Direct Force Measurements of Receptor–Ligand Interactions on Living Cells</b>  |    |
|           | <i>Robert H. Eibl</i> .....   | 1  |
| 9.1       | Introduction .....  | 2  |
| 9.2       | Procedure .....   | 8  |
| 9.2.1     | Principle of AFM Force Spectroscopy .....   | 9  |
| 9.2.2     | Cell–Cell Interactions .....  | 9  |
| 9.2.3     | Cell-Substrate Measurements .....   | 12 |
| 9.2.4     | Specificity and Blocking Antibodies .....   | 14 |
| 9.2.5     | Activation by SDF-1 .....   | 17 |
| 9.3       | Protocols .....   | 20 |
| 9.3.1     | Cantilever Functionalization .....  | 20 |
| 9.3.2     | AFM Measurement on Living Cells .....   | 22 |
| 9.3.3     | Inhibition with Blocking Antibodies, Peptidomimetic Inhibitors<br>or EDTA .....   | 25 |
| 9.3.4     | Activation with Mg <sup>2+</sup> , Mn <sup>2+</sup> Ions, Activating Antibodies,<br>Phorbol ester or Chemokines .....               | 26 |
| 9.3.5     | AFM Measurement—Cell Free .....   | 26 |
| 9.4       | Conclusion and Future Developments .....  | 27 |
|           | References .....  | 29 |
| <b>10</b> | <b>Imaging Chemical Groups and Molecular Recognition Sites on Live Cells Using AFM</b>  |    |
|           | <i>David Alsteens, Vincent Dupres, Etienne Dague, Claire Verbelen,<br/>Guillaume André, Grégory Francius, Yves F. Dufrêne</i> ..... | 33 |
| 10.1      | Introduction .....  | 33 |
| 10.2      | Chemical Force Microscopy .....   | 34 |
| 10.2.1    | Methods .....   | 34 |
| 10.2.2    | Probing Hydrophobic Forces .....  | 35 |
| 10.2.3    | Chemical Force Microscopy of Live Cells .....   | 38 |
| 10.3      | Molecular Recognition Imaging .....   | 42 |
| 10.3.1    | Spatially Resolved Force Spectroscopy .....   | 43 |

|           |   |    |
|-----------|---|----|
| 10.3.2    | Immunogold Imaging . . . . .  | 45 |
| 10.4      | Conclusions . . . . .   | 47 |
|           | References . . . . .  | 47 |
| <b>11</b> | <b>Applications of Scanning Near-Field Optical Microscopy in Life Science</b><br><i>Pietro Giuseppe Gucciardi</i> . . . . .   | 49 |
| 11.1      | Introduction . . . . .  | 50 |
| 11.2      | Experimental Techniques in Near-Field Optical Microscopy . . . . .  | 51 |
| 11.2.1    | Principles of Near-Field Optical Microscopy . . . . .   | 51 |
| 11.2.2    | Fluorescence Near-Field Optical Microscopy . . . . .  | 53 |
| 11.2.3    | Near-Field Optical Microscopy in Liquid . . . . .   | 55 |
| 11.2.4    | Tip-Enhanced Near-Field Optical Microscopy . . . . .  | 57 |
| 11.3      | Applications of Near-Field Optical Microscopy in Life Science . . . . .   | 58 |
| 11.3.1    | Infrared Imaging of Tobacco Mosaic Virus with Nanoscale Resolution . . . . .  | 58 |
| 11.3.2    | Co-Localization of Malarial and Host Skeletal Proteins in Infected Erythrocytes by Dual-Color Near-Field Fluorescence Microscopy . . . . .                              | 59 |
| 11.3.3    | Co-Localization of $\alpha$ -Sarcoglycan and $\beta$ 1D-Integrin in Human Muscle Cells by Near-Field Fluorescence Microscopy . . . . .                                  | 61 |
| 11.3.4    | Single Molecule Near-Field Fluorescence Microscopy of Dendritic Cells . . . . .   | 62 |
| 11.3.5    | Chemical Information of Bacterial Surfaces and Detection of DNA Nucleobases by Tip-Enhanced Raman Spectroscopy . . . . .  | 64 |
| 11.4      | Conclusions . . . . .   | 65 |
|           | References . . . . .  | 66 |
| <b>12</b> | <b>Adhesion and Friction Properties of Polymers at Nanoscale: Investigation by AFM</b><br><i>Sophie Bistac, Marjorie Schmitt</i> . . . . .                              | 69 |
| 12.1      | Introduction . . . . .  | 69 |
| 12.2      | Experimental Part . . . . .   | 72 |
| 12.3      | Nano-Adhesion Investigation . . . . .   | 73 |
| 12.4      | Nano-Friction Investigation . . . . .   | 75 |
| 12.5      | Relation Between Adhesion and Friction at Nanoscale . . . . .   | 78 |
| 12.6      | Comparison with Macroscale Results . . . . .  | 79 |
|           | References . . . . .  | 83 |
| <b>13</b> | <b>Mechanical Characterization of Materials by Micro-Indentation and AFM Scanning</b><br><i>Gabriella Bolzon, Massimiliano Bocciarelli, Enzo J. Chiarullo</i> . . . . . | 85 |
| 13.1      | Introduction . . . . .  | 85 |

|        |   |     |
|--------|---|-----|
| 13.2   | Experimental Techniques . . . . .                         | 89  |
| 13.2.1 | Micro-Indentation . . . . .                               | 89  |
| 13.2.2 | AFM Scanning . . . . .                                    | 90  |
| 13.3   | Inverse Analysis for Materials Characterization . . . . . | 94  |
| 13.3.1 | Simulation of the Test . . . . .                          | 94  |
| 13.3.2 | Optimization Procedures . . . . .                         | 100 |
| 13.4   | Applications . . . . .                                    | 102 |
| 13.4.1 | On the Role of Friction . . . . .                         | 103 |
| 13.4.2 | Tests Concerning HHM and DP Models . . . . .              | 104 |
| 13.4.3 | Anisotropic Materials . . . . .                           | 105 |
| 13.4.4 | Self Stresses . . . . .                                   | 109 |
| 13.4.5 | Coatings and Layered Systems . . . . .                    | 110 |
|        | References . . . . .                                      | 116 |

**14 Mechanical Properties of Metallic Nanocontacts**

*G. Rubio-Bollinger, J.J. Riquelme, S.Vieira, N. Agrait . . . . .* 121

|        |   |     |
|--------|---|-----|
| 14.1   | Introduction . . . . .  | 122 |
| 14.2   | Experimental Tools . . . . .  | 123 |
| 14.2.1 | The Scanning Tunneling Microscope Supplemented with a Force<br>Sensor . . . . . | 125 |
| 14.2.2 | The Mechanically Controllable Break-Junction Technique . . . . .                | 126 |
| 14.3   | Electron Transport Through Metallic Nanocontacts . . . . .                      | 128 |
| 14.4   | Mechanical Properties of Metallic Nanocontacts . . . . .                        | 129 |
| 14.4.1 | Fabrication of Metallic Nanocontacts . . . . .                                  | 129 |
| 14.4.2 | Elasticity and Fracture of Metallic Nanocontacts . . . . .                      | 131 |
| 14.4.3 | The Shape of Metallic Nanocontacts . . . . .                                    | 132 |
| 14.4.4 | Inelastic Scattering by Phonons in Nanocontacts . . . . .                       | 134 |
| 14.5   | Suspended Chains of Single Gold Atoms . . . . .                                 | 135 |
| 14.5.1 | Fabrication of Chains of Atoms Using Local Probes . . . . .                     | 136 |
| 14.5.2 | Mechanical Processes During Formation of Atomic Chains . . . . .                | 137 |
| 14.5.3 | Phonons in Atomic Chains . . . . .  | 140 |
| 14.6   | Metallic Adhesion in Atomic-Sized Tunneling Junctions . . . . .                 | 144 |
|        | References . . . . .  | 146 |

**15 Dynamic AFM in Liquids: Viscous Damping and Applications to the Study of Confined Liquids**

*Abdelhamid Maali, Touria Cohen-Bouhacina, Cedric Hurth, Cédric  
Jai, R. Boisgard, Jean-Pierre Aimé . . . . .* 149

|      |                        |     |
|------|------------------------|-----|
| 15.1 | Introduction . . . . . | 149 |
|------|------------------------|-----|

|           |   |     |
|-----------|---|-----|
| 15.2      | Viscous Hydrodynamic Damping of the Cantilever<br>in a Water Medium .....   | 150 |
| 15.3      | Improving the Acoustic Excitation of the Cantilever-Tip .....   | 153 |
| 15.4      | Theoretical Description of the Motion of an Acoustically<br>Driven Cantilever in Liquid .....   | 155 |
| 15.5      | Atomic Force Microscopy Study of the Molecular<br>Ordering of a Confined Liquid .....   | 160 |
| 15.6      | Conclusion .....  | 163 |
|           | References .....  | 163 |
| <b>16</b> | <b>Microtensile Tests Using In Situ Atomic Force Microscopy</b><br><i>Udo Lang, Jurg Dual</i> .....   | 165 |
| 16.1      | Introduction .....  | 166 |
| 16.2      | Literature Review .....   | 166 |
| 16.2.1    | Organic Samples .....   | 166 |
| 16.2.2    | Anorganic Samples .....   | 170 |
| 16.2.3    | Summary .....   | 172 |
| 16.3      | Recent Developments at the Center of Mechanics of ETH Zurich ...  | 172 |
| 16.3.1    | Setup .....   | 172 |
| 16.3.2    | Results .....   | 176 |
| 16.3.3    | Outlook .....   | 179 |
| 16.4      | Conclusions .....   | 180 |
|           | References .....  | 180 |
| <b>17</b> | <b>Scanning Tunneling Microscopy of the Si(111)-7×7 Surface and Adsorbed<br/>Ge Nanostructures</b><br><i>Haiming Guo, Yeliang Wang, Hongjun Gao</i> ..... | 183 |
| 17.1      | Introduction .....  | 184 |
| 17.2      | STM Imaging on Si(111)-7×7: Resolving the Rest Atoms .....  | 185 |
| 17.2.1    | The Familiarity: Si(111)-7×7 Structure and STM .....  | 185 |
| 17.2.2    | The Simultaneous Imaging of the Rest Atoms and Adatoms .....  | 187 |
| 17.2.3    | Voltage-Dependent Imaging of Rest Atoms .....   | 188 |
| 17.2.4    | First-Principles Calculations .....   | 191 |
| 17.3      | Atomic Manipulation on Si(111)-7×7 Surfaces with STM .....  | 193 |
| 17.3.1    | Introduction .....  | 193 |
| 17.3.2    | Fabricating Groove Nanostructures on Si(111)-7×7 Surfaces .....   | 193 |
| 17.3.3    | The Modification Mechanism .....  | 195 |
| 17.4      | Ge Nanostructure Growth on Si(111)-7×7 Surfaces .....   | 197 |
| 17.4.1    | Introduction .....  | 197 |

---

|        |   |     |
|--------|---|-----|
| 17.4.2 | Experimental Aspects . . . . .  | 198 |
| 17.4.3 | Initial Adsorption of Ge Atoms on the Si(111)-7×7 Surface . . . . .                           | 198 |
| 17.4.4 | Temperature Dependence of Formation and Arrangement<br>of Ge Clusters . . . . .               | 205 |
| 17.4.5 | Electronic Structures of Ge Clusters and Evolution of the Hexagonal<br>Superlattice . . . . . | 208 |
| 17.4.6 | Formation of Ge Islands and Ge–Si Intermixing at High Temperature                             | 212 |
| 17.5   | Conclusions . . . . .   | 216 |

# Contents – Volume XI

|          |   |    |
|----------|---|----|
| <b>1</b> | <b>Oscillation Control in Dynamic SPM with Quartz Sensors</b>   |    |
|          | <i>Johann Jersch, Harald Fuchs</i> .....  | 1  |
| 1.1      | Introduction .....  | 1  |
| 1.2      | Definition and Measurement of Signal Parameters .....   | 3  |
| 1.3      | Connection Between Oscillation Parameters and Tip–Sample Interactions .....   | 7  |
| 1.4      | Oscillation Control for QCR, Technical Realization .....  | 8  |
| 1.5      | Applications of the Oscillation Controllers .....   | 12 |
| 1.6      | Summary .....   | 13 |
|          | References .....  | 14 |
| <br>     |   |    |
| <b>2</b> | <b>Atomic Force Microscope Cantilevers Used as Sensors for Monitoring Microdrop Evaporation</b>                                     |    |
|          | <i>Elmar Bonaccorso, Dmytro S. Golovko, Paolo Bonanno, Roberto Raiteri, Thomas Haschke, Wolfgang Wiechert, Hans-Jürgen Butt</i> ... | 17 |
| 2.1      | Introduction .....  | 18 |
| 2.2      | Background, Materials and Methods .....   | 19 |
| 2.2.1    | Drop in Equilibrium .....   | 19 |
| 2.2.2    | Evaporating Drop .....  | 21 |
| 2.2.3    | Experimental Setup .....  | 22 |
| 2.3      | Evaporation Results on Microdrops .....   | 24 |
| 2.3.1    | Evaporation Curve .....   | 24 |
| 2.3.2    | Force Model .....   | 24 |
| 2.3.3    | Negative Inclination .....  | 26 |
| 2.3.4    | Mass and Inclination .....  | 28 |
| 2.3.5    | Vaporization Heat .....   | 30 |
| 2.4      | Further Applications of Drops on Cantilevers .....  | 31 |
| 2.4.1    | Spring Constant Calibration .....   | 31 |
| 2.4.2    | Contamination Control of Cantilevers .....  | 33 |

|          |  |    |
|----------|--|----|
| 2.5      | Conclusions .....  | 36 |
|          | References .....   | 36 |
| <b>3</b> | <b>Mechanical Diode-Based Ultrasonic Atomic Force Microscopies</b>                               |    |
|          | <i>M. Teresa Cuberes</i> .....   | 39 |
| 3.1      | Introduction: Acoustic Microscopy in the Near Field .....  | 39 |
| 3.1.1    | Acoustic Microscopy: Possibilities and Limitations .....   | 39 |
| 3.1.2    | Ultrasonic Atomic Force Microscopies .....   | 41 |
| 3.2      | Ultrasonic Force Microscopy: The Mechanical Diode Effect .....                                   | 44 |
| 3.2.1    | The Mechanical Diode Effect .....  | 44 |
| 3.2.2    | Experimental Implementation of UFM .....   | 46 |
| 3.2.3    | Information from UFM Data .....  | 47 |
| 3.2.4    | Applications of UFM in Nanofabrication .....   | 52 |
| 3.3      | Mechanical Diode Ultrasonic Friction Force Microscopy .....                                      | 54 |
| 3.3.1    | The Lateral Mechanical Diode Effect .....  | 54 |
| 3.3.2    | Experimental Implementation of MD-UFFM .....   | 56 |
| 3.3.3    | Comparison of MD-UFFM with UFFM and TRmode AFM .....   | 56 |
| 3.3.4    | Information from MD-UFFM Data .....  | 58 |
| 3.4      | Heterodyne Force Microscopy: Beats at Nanocontacts .....   | 62 |
| 3.4.1    | Beats at Nanocontacts .....  | 62 |
| 3.4.2    | Experimental Implementation of HFM .....   | 64 |
| 3.4.3    | Comparison of HFM with UFM .....   | 65 |
| 3.4.4    | Information from HFM: Time Resolution .....  | 66 |
|          | References .....   | 68 |
| <b>4</b> | <b>Contact Atomic Force Microscopy: A Powerful Tool in Adhesion Science</b>                      |    |
|          | <i>Maurice Brogly, Houssein Awada, Olivier Noel</i> .....  | 73 |
| 4.1      | Introduction .....   | 73 |
