

# Table of Contents

<b>Introduction</b>	<b>1</b>
<b>PART I Demand</b>	<b>3</b>
<b>1 Modeling Seasonal Integrated Time Series: the Spanish Industrial Production Index</b>	
J. L. Gallego-Gómez	<b>5</b>
1.1 Seasonal Time Series Models	5
1.2 Forecasting	9
1.3 Unobservable Components	11
1.4 Empirical Analysis	12
References	16
<b>2 Passenger's Choice of Air Transport under Road Competition: the Use of Cointegration Techniques</b>	
J. Baños-Pino, P. Coto-Millán, V. Inglada-López de Sabando	<b>19</b>
2.1 Introduction	19
2.2 The Model	21
2.3 The Data	22
2.4 Marshallian or Non Compensated Demands of Interurban Passenger Transport: Air and Road Transport	23
2.4.1 Air Transport Demand	23
2.4.2 Road Transport Demand	25
2.5 Conclusions	27
References	27
<b>3 Introduction of an Innovative Product: the High Speed Train (AVE)</b>	
V. Inglada-López de Sabando, P. Coto-Millán	<b>29</b>
3.1 AVE: Characterisation	29
3.2 Qualitative Analysis	31
3.3 The Concept of Generalised Cost	33

3.4	Comparison Among Different Competing Products	35
3.5	Induction and Substitution Effects	38
3.5.1	Induction Effect	38
3.5.2	Substitution Effect	39
3.5.3	The Demand for the New Product	39
3.6	Impact on Demand	40
	References	40
<b>4</b>	<b>An Approach to the Hub-and-Spoke Systems from SVARs Models. A Practical Application to Container Traffic between the Port of Bahía de Algeciras and Other Ports of the Spanish Port System (Bahía de Cádiz and Las Palmas)</b>	
	J. I. Castillo-Manzano, P. Coto-Millán, L. López-Valpuesta	<b>41</b>
4.1	Introduction and Reasons for Analysis	41
4.2	VAR Models: Methodological Approach	42
4.2.1	Impulse Response	43
4.3	Formulating Long-Run Restrictions under a SVAR Model Applied to a Hub-and-Spoke System	44
4.4	Practical Application to Container Traffic between the Bahía de Algeciras Port and other Ports of the Spanish Port System	47
4.4.1	Scenario 1: Existence of a Shared Hinterland between the Infrastructures. Practical Applications: Bivariate SVAR between the Ports Bahía de Algeciras and Cádiz	48
4.4.2	Scenario 2: Lack of Shared Hinterland between Infrastructures. A Practical Application: Bivariate SVAR between the Bahía de Algeciras and Las Palmas Ports	53
4.5	Conclusions	57
	References	58
	<b>PART II. Production and Costs (Supply)</b>	<b>59</b>
<b>5</b>	<b>Technical and Allocative Inefficiency in Spanish Public Hospitals</b>	
	C. García-Prieto	<b>61</b>
5.1	The Model	62
5.2	Definition of Variables and Functional Specification	66
5.2.1	Outputs	67
5.2.2	Input Prices	67
5.2.3	Fixed Input	68
5.2.4	Functional Form	68
5.3	Estimation and Results	69
5.4	Conclusions	72
	References	73

<b>6</b>	<b>Technical Efficiency of Road Haulage Firms</b>	
	J. Baños-Pino, P. Coto-Millán, A. Rodríguez-Álvarez, V. Inglada-López de Sabando	75
6.1	Introduction	75
6.2	Efficiency	76
6.3	Classification of Efficiency Frontiers	78
6.4	A Theoretical Application to Goods Haulage Companies on Spanish Roads Using Panel Data	80
	References	86
<b>7</b>	<b>Technical Efficiency and Liberalisation within International Air Transport (1992- 2000)</b>	
	P. Coto-Millán, V. Inglada-López de Sabando, B. Rey, A. Rodríguez-Álvarez	89
7.1	Introduction	89
7.2	Methodology	92
7.3	Description of the Data and the Variables Used	94
7.4	Econometric Specification	94
7.5	Results of the Estimation	95
7.6	Conclusions	100
	References	101
<b>8</b>	<b>Technological Innovation and Employment: Intersectoral Appraisals of Structural Change in the Service Economy</b>	
	D. Díaz-Fuentes	103
8.1	Introduction	103
8.2	Extent of Structural Change in Services Employment	106
8.3	Innovation and Employment Trends in Structural Change	108
8.4	Embodied Technology and Technology Diffusion in Services	110
8.5	Compositional Structural Change in Employment (Final and Intermediate Demand for Services)	114
8.6	Conclusions	116
	References	117
<b>PART III</b>	<b>Market and Industrial Structure</b>	<b>121</b>
<b>9</b>	<b>The Measurement of Intra-industry Trade and Specialisation: a Review</b>	
	G. Carrera-Gómez	123
9.1	Measures of Intra-industry Trade and Specialisation	123
9.1.1	Intra-industry Trade Indices	124
9.1.2	Intra-industry Specialisation Indices	131
9.1.3	Comparison of Measures	134

9.1.4	Later Developments	136
9.2	Trade Imbalance Adjustment	139
9.2.1	Grubel and Lloyd (1975)	139
9.2.2	Aquino (1978)	141
9.2.3	Balassa (1979)	144
9.2.4	Loertscher and Wolter (1980)	145
9.2.5	Bergstrand (1982)	145
9.2.6	Comments and Conclusions	147
9.3	Categorical Aggregation	148
9.3.1	Definition of the Problem	148
9.3.2	Categorical Aggregation Tests	149
9.3.3	Critics and Conclusions	151
9.4	Summary and Conclusions	152
	References	153
<b>10</b>	<b>Measurement of Intra-industry Trade: a Categorical Aggregation Exercise with Spanish Trade Data</b>	
	G. Carrera-Gómez	<b>155</b>
10.1	Introduction	155
10.2	Methodology	156
10.2.1	Measurement of Intra-industry Trade	156
10.2.2	Categorical Aggregation: Definition of the Problem and Assessment Methods	157
10.3	Main Results Obtained	159
10.4	Summary and Conclusions	162
	References	163
<b>11</b>	<b>The Determinants of Intra-industry Trade in Spanish Manufacturing Sectors: a Cross-section Analysis</b>	
	G. Carrera-Gómez	<b>165</b>
11.1	Spanish Intra-industry Trade Measurement	166
11.2	Analysis of the Determinants of Intra-industry Trade in Spain	167
11.2.1	Hypotheses	167
11.2.2	Data, Variables and Econometric Model	169
11.2.3	Results	171
11.3	Summary and Conclusions	173
	References	173
<b>12</b>	<b>Economic Integration, Vertical and Horizontal Intra-industry Trade and Structural Adjustment: the Spanish Experience</b>	
	G. Carrera-Gómez	<b>175</b>
12.1	Data and Methodology	176
12.2	Results	179
12.3	Summary and Conclusions	184
	References	184

**PART IV. Failures of Market and Industrial Regulation 187**

<b>13 Organisation and Regulation of the Port Industry: Europe and Spain</b>	
B. Tovar, L. Trujillo, S. Jara-Díaz	<b>189</b>
13.1 Introduction	189
13.2 Models of Port Property and Management	190
13.3 Private Participation in Ports	191
13.4 Regulation of Port Activities	193
13.5 Port Services and Terminals	194
13.5.1 Cargo Unitisation	196
13.5.2 Factors of Production and Their Regulation	196
13.6 Port Regulation in the European Union	199
13.6.1 Port Regulation in Spain	201
13.7 Conclusions	203
References	205
<b>14 Positive Theory of Regulation: an Application to Spanish Foreign Trade</b>	
G. Carrera-Gómez, P. Coto-Millán, J. Villaverde-Castro	<b>209</b>
14.1 Introduction	209
14.2 Data and Variables	210
14.3 Empirical Results	214
14.4 Conclusions	216
References	216
<b>15 Structure, Functioning and Regulation of the Spanish Electricity Sector. The Legal Framework and the New Proposals for Reform</b>	
F. J. Ramos-Real, E. Martínez-Budría, S. Jara-Díaz	<b>219</b>
15.1 Introduction	219
15.2 Structure, Functioning and Regulation of the Spanish Electricity Sector between 1983-1996	220
15.2.1 The Reform Process and the Basic Principles Regulating the System's Operation (1983-1996)	222
15.2.2 Unified Management and Central Planning	223
15.2.3 The Rates and Financial Return Policy of the Legal and Stable Framework (MLE)	224
15.3 Regulation Reform in the Spanish Electricity Sector from 1997	231
15.4 Conclusions	235
References	236

<b>16 Effects of a Reduction of Standard Working Hours on Labour Market Performance</b>	
C. Pérez-Domínguez	<b>237</b>
16.1 Effects on Employment	238
16.1.1 The Basic Model	238
16.1.2 The Role of Fixed Labour Costs	239
16.1.3 Effort Effect and Organisational Effect	241
16.2 Effects on Labour Market Participation	244
16.2.1 Labour Market Participation with Compulsory Working Hours	244
16.2.2 Effects of a Reduction of the Working Hours on Aggregate Labour Supply	246
16.3 Effects on the Unemployment Rate	247
16.3.1 The Basic Case	247
16.3.2 Effects on the Unemployment Rate under a More General Model	249
16.4 Conclusions	250
References	251
<b>17 Transitional Dynamics and Endogenous Growth Revisited: the Case of Public Capital</b>	
B. Sánchez-Robles	<b>253</b>
17.1 Introduction	253
17.2 Setup of the Models	254
17.3 Solution for the BGP in the CES Case	256
17.4 The Time Elimination Method and the Analysis of Transitional Dynamics	260
17.5 Discussion of the Main Results of the Simulations	262
17.6 Conclusions	272
Appendix	273
References	274
<b>18 Unions, Wages and Productivity. The Spanish Case, 1981-2000</b>	
N. Sánchez-Sánchez, B. Sánchez-Robles	<b>277</b>
18.1 Introduction	277
18.2 Theoretical Background	280
18.2.1 Elasticity of Output with Respect to Unions through Wages	281
18.2.2 Elasticity of Productivity to Unions through Changes in Efficiency	282
18.2.3 Total Elasticity of Productivity to Unions	283
18.3 Empirical Analysis	283
18.4 Data and Variables	285
18.5 Main Empirical Results	286
18.6 Concluding Remarks	293
References	294

<b>19 Comparative Analysis of Port Economic Impact Studies in the Spanish Port System (1992- 2000)</b>	
J. I. Castillo-Manzano, P. Coto-Millán, M. A. Pesquera, L. López-Valpuesta	<b>297</b>
19.1 Introduction	297
19.2 The Economic Impact Studies as a Tool Employed by the Port System	298
19.3 Spanish Impact Studies Representative Sample	300
19.4 Comparative Methodology of the Impact Studies	306
19.4.1 Variables Chosen	306
19.4.2 Testing by Homogenising the Variables over Time	307
19.4.3 Testing by the Homogenisation of the Variables over Time and in the Geographical Area	309
19.5 Conclusions	314
Appendix	315
References	315
Additional References	316
<b>20 Economic Impact of Santander Airport</b>	
G. Carrera-Gómez, P. Coto-Millán, R. Sainz-González, V. Inglada-López de Sabando	<b>317</b>
20.1 Introduction	317
20.2 Direct Effects of the Airport Industry	319
20.2.1 Santander Airport. AENA	319
20.2.2 Customs and Administration Services	319
20.2.3 Rest of Airport Industry	320
20.2.4 Total Airport Industry	320
20.3 Indirect and Induced Effects of Airport Industry	321
20.3.1 Regionalisation of the National Input-Output Table	322
20.3.2 Indirect and Induced Impact Vectors	324
20.3.3 Total Airport Industry	328
20.4 Total Effects of the Airport Industry	329
20.5 Effects of the Airport-Dependent Industry	329
20.6 Induced Effects of the Airport-Dependent Industry	330
20.7 Impact of Santander Airport on the Economy of Cantabria	331
20.8 Summary and Conclusions	331
References	332
Other References	332
<b>21 Dynamic Adjustments in a Two-Sector Model</b>	
F. Galera, P. Coto-Millán	<b>333</b>
21.1 The Formal Model	333
21.2 Basic Results	335
21.3 Conclusions	337
Annex	337

<b>22 Market Failures: the Case for Road Congestion Externalities</b>	
V. Inglada-López de Sabando, P. Coto-Millán	<b>343</b>
22.1 Introduction	343
22.2 Externality	344
22.2.1 Concept	344
22.3 Transport Externalities	346
22.3.1 Methodological Framework	346
22.3.2 Typology	347
22.3.3 Internalisation Instruments	348
22.4 Congestion	349
22.4.1 Concept	349
22.4.2 Congestion Pricing	350
22.5 The Case of Spain	354
22.5.1 Assessment Process	354
22.5.2 Results	356
22.6 Conclusions	358
References	358
<b>23 Social Benefits of Investment Projects: the Case for High-Speed Rail</b>	
V. Inglada-López de Sabando, P. Coto-Millán	<b>361</b>
23.1 Introduction	361
23.2 Methodological Framework	362
23.3 High-Speed Rail	364
23.3.1 Main Features	364
23.3.2 Corridor Features	365
23.3.3 Features of the AVE	366
23.3.4 Mode Parameters and Features	367
23.3.5 Demand	370
23.4 Cost-Benefit Analysis	371
23.4.1 Social Costs	371
23.4.2 Social Benefits	373
23.4.3 Other Social Benefits	375
23.4.4 Other Evaluation Hypotheses	381
23.4.5 Social Profitability	382
23.5 Conclusions	384
