Introduction	1
Why liquidity?	1
Goals of the Analysis.....	2
Structure of the Analysis	4
Chapter 1: The Concept of Liquidity	9
1.1. Definition of Liquidity	10
1.1.1. Review of Liquidity Definitions.....	10
1.1.1.1. Asset Liquidity.....	13
1.1.1.2. Market Liquidity	18
1.1.1.3. Corporate Liquidity.....	25
1.1.1.4. Relations between the Notions of Liquidity	27
1.1.2. Liquidity Risk.....	29
1.1.2.1. Liquidity Risk of Privately Traded Assets.....	29
1.1.2.2. Liquidity Risk in Public Markets.....	32
1.1.3. A Two-Dimensional Definition of Liquidity	36
1.2. Sources of Liquidity.....	40

1.2.1. Preliminary Considerations	41
1.2.2. Transaction and Opportunity Costs	44
1.2.2.1. Commissions and Taxes	44
1.2.2.2. Indirect Transaction Costs	48
1.2.2.3. Opportunity Costs	51
1.2.3. Market Organization and the Search for a Trading Partner	55
1.2.3.1. Forms of Market Organization	55
1.2.3.2. Market Organization, Search, and Liquidity	59
1.2.4. Diversity of Valuations.....	64
1.3. Review of Illiquid Assets.....	73
1.3.1. Characteristics of Illiquid Assets.....	74
1.3.2. Real Estate	76
1.3.3. Private Equity	81
1.3.4. Alternative Investments.....	84
1.4. Economic Relevance of Liquidity	88
1.4.1. Money and Liquidity Preference	88
1.4.2. Liquidity in Investment Decisions.....	92
1.4.2.1. Investment Goals	92
1.4.2.2. Expected and Unexpected Liquidation	98
1.4.2.3. Liquidity in the Sale Case and in the Purchase Case.....	100
1.4.2.4. Individual Liquidity and Portfolio Liquidity	102
Chapter 2: Search in Illiquid Markets.....	105
2.1. The Theory of Search.....	106

2.2. Introduction to Search Models.....	110
2.2.1. Search Framework.....	110
2.2.2. Search Strategy	114
2.2.3. Basic Search Model.....	116
2.2.4. Karlin's Model.....	121
2.3. The Real Estate Search Model.....	123
2.3.1. Framework Modifications	124
2.3.1.1. Distribution of Offers.....	125
2.3.1.2. Continuous Time.....	126
2.3.1.3. Opportunity Cost and Discounting	128
2.3.1.4. Rental Revenues.....	129
2.3.1.5. Market Uncertainty	131
2.3.1.6. The Relative Approach	135
2.3.2. Model Design	137
2.3.3. Limitations and Possible Extensions	142
2.3.3.1. Bounded Search Horizon	143
2.3.3.2. Dynamic Market	146
2.3.3.3. Unknown Offer Distribution and Learning	149
2.3.3.4. Offer Recalls	152
2.3.3.5. Intensity of Search	153
2.3.3.6. Listing Price	154
2.3.3.7. Search for the Best Seller.....	156
2.3.4. MCS Solution	158
2.3.5. Liquidity within the Model.....	163
2.4. Search and the Functioning of Illiquid Markets	166

Chapter 3: Liquidity Measurement	171
3.1. Traditional Measures of Market Liquidity.....	172
3.1.1. Liquidity of Public Markets.....	173
3.1.1.1. Bid-Ask Spread.....	173
3.1.1.2. Market Depth	177
3.1.1.3. Price Reversal	179
3.1.2. Application to Real Estate Markets.....	182
3.1.2.1. Implicit Bid-Ask Spread	182
3.1.2.2. Quick Sale Discount	185
3.1.2.3. Market Depth	186
3.1.2.4. Market Resiliency	189
3.2. Time- and Probability-Based Measures.....	191
3.2.1. Probability of Sale and Time on the Market	191
3.2.2. Proportional Hazard Ratio.....	195
3.3. Measures of Liquidity Risk.....	197
3.3.1. Principles of Risk Measurement.....	198
3.3.2. Volatility.....	202
3.3.3. Asymmetric Measures	209
3.3.3.1. Default Probability.....	210
3.3.3.2. Semivolatility and Lower Partial Moments.....	214
3.3.3.3. Value at Risk.....	216
3.4. Alternative Measurement Approaches.....	220
3.4.1. Liquidity Performance Measures	221

3.4.2. Utility-Based Measurement.....	223
3.5. Relations between the Measures.....	226
Chapter 4: Liquidity as a Decision Criterion.....	233
4.1. Investment Decisions in the Mean-Variance Framework.....	234
4.1.1. The Efficiency Criterion.....	234
4.1.2. Diversification and Mean-Variance Portfolio Selection.....	238
4.1.3. Portfolio Selection with Risk-Free Assets.....	241
4.1.4. Limitations of the MV-Criterion.....	242
4.2. Strategic Liquidation.....	244
4.2.1. Literature Review.....	245
4.2.2. Efficiency of Liquidation Strategies.....	247
4.2.3. Liquidation Strategies for Portfolios of Assets.....	254
4.2.3.1. The Liquidity-Diversification Effect.....	254
4.2.3.2. Covariance of Gains.....	255
4.2.3.3. Portfolio Effect of Liquidation.....	258
4.2.4. Simultaneous Liquidation of Liquid and Illiquid Assets.....	266
4.3. Optimal Liquidation and the Notion of Liquidity.....	270
4.3.1. Liquidity in Terms of Efficient Liquidation Strategies.....	271
4.3.2. Liquidity with Liquid and Illiquid Assets.....	272
4.3.3. Liquidity of Assets in Portfolios.....	274
4.4. Portfolio Selection with Illiquid Assets.....	276
4.4.1. Literature Review.....	277

4.4.1.1. Asset Allocation with Non-Tradable Assets.....	278
4.4.1.2. Models with Trade Restrictions.....	280
4.4.1.3. Liquidity as an Independent Decision Criterion.....	283
4.4.2. MPT with Illiquid Assets.....	286
4.4.2.1. Planned Portfolio Liquidation.....	287
4.4.2.2. Unexpected Portfolio Liquidation	292
4.4.3. Optimization Algorithms.....	299
4.4.4. Sources of Biases.....	302
4.4.4.1. Effects of Search Model Imperfections	302
4.4.4.2. Risk Measurement Issues.....	304
Chapter 5: Liquidity of German Condominium Markets	307
5.1. Determination of Model Parameters.....	308
5.1.1. Volatility of Offers	308
5.1.2. Offer Arrival Frequency	311
5.1.3. Other Parameters	313
5.2. Condominium Liquidity Analysis	314
5.2.1. Data Material	315
5.2.1.1. RDM/IVD Data.....	315
5.2.1.2. GAA Data	316
5.2.1.3. Determination of Model Parameters.....	319
5.2.2. Liquidity Measurement	323
5.2.2.1. Market Depth	323
5.2.2.2. Market Breadth	324

5.2.2.3. Time on Market.....	327
5.2.2.4. Liquidity Risk	331
5.2.2.5. Liquidity Risk Reward.....	336
5.2.2.6. Two-Dimensional Liquidity Assessment.....	337
5.2.2.7. Comparison of the Measures	341
5.2.3. Condominiums in Portfolio Decisions	347
5.2.3.1. Planned Liquidation, Return Characteristics, and the Efficient Frontier.....	348
5.2.3.2. Portfolio Selection in a Multidimensional Decision Framework with Liquidity Criterion	352
5.3. Discussion of the Results	357
Concluding remarks	363
Appendix	367
References	397
