

## Table of contents

1	Executive Summary	1
2	Introduction	3
3	Research approach	5
4	Desk research results	7
5	Technology transfer survey	15
5.1	General issues	15
5.2	Frequency analyses for companies and university researchers	26
5.2.1	Frequency analyses for companies	26
5.2.2	Frequency analyses for university researchers	32
5.3	Bi-variate analyses for companies and university researchers	36
5.3.1	Companies: What makes companies in- or outsiders?	36
5.3.2	Companies: Differences between companies having expenditures for universities, companies not having expenditures for but contacts to universities and companies not having contacts to universities	38
5.3.3	Companies: Differences in technology transfer features of companies with expenditures for universities and companies without expenditures for but contacts to universities	39
5.3.4	Companies: Differences between companies interested in establishing contacts to universities and companies not being interested in establishing contacts to universities	40
5.3.5	Companies: Which companies' characteristics, technology features, barriers, and motives influence the amount of companies' expenditures for universities?	41
5.3.6	Companies: Which companies' characteristics, technology features, barriers, and motives influence companies' frequency in using technology transfer means?	42
5.3.7	Companies: Which companies' characteristics, technology transfer features, barriers, and motives influence the expected future development of companies' expenditures for universities?	45
5.3.8	Companies: Which companies' characteristics and technology transfer features influence companies' assessment of the importance of barriers and motives?	46
5.3.9	University researchers: Which university researchers' characteristics influence whether or not university researchers are in contact with companies?	50
5.3.10	University researchers: Which university researchers' characteristics, technology transfer features, barriers and motives influence the number of monthly personal contacts of university researchers with different companies?	51
5.3.11	University researchers: Which university researchers' characteristics, technology transfer features, barriers and motives influence the amount of time spend by university researchers for collaborations with companies?	52
5.3.12	University researchers: Which university researchers' characteristics and technology transfer features influence the frequency of use of technology transfer means?	53
5.3.13	University researchers: Which university researchers' characteristics, technology transfer features, barriers and motives influence benefits of technology transfer perceived by university researchers?	56
5.3.14	University researchers: Which university researchers' characteristics and technology transfer features influence barriers and motives?	58

5.3.15	Companies and university researchers: Assessing the importance of technology transfer barriers and motives from their own point of view and the view of potential partners	65
6	Typology of companies and university researchers	69
6.1	Approach to identify a typology scheme	69
6.2	Typology for companies	72
6.2.1	Companies with expenditures for universities	75
6.2.2	Companies without expenditures for but with contacts to universities	84
6.2.3	Companies not yet having contacts to universities but interested in building up relations	90
6.2.4	Companies not yet having contacts to universities and not being interested in building up relations	93
6.2.5	Overview of specific characteristics of companies belonging to the different groups	94
6.3	Typology for university researchers	97
6.3.1	University researchers with contacts to companies	99
6.3.2	University researchers not yet having contacts to companies but interested in building up relations and university researchers not yet having contacts to companies and not interested in building up relations	110
6.3.3	Overview of specific characteristics of university researchers belonging to the different groups	112
7	Interviews with company representatives and university researchers	115
7.1	Interviews with company representatives	115
7.1.1	Companies with expenditures for universities	115
7.1.1.1	Why and how did the company establish contacts to universities?	117
7.1.1.2	How satisfying are your contacts with universities?	119
7.1.1.3	Is technology transfer going to change?	120
7.1.1.4	Which support services would help to improve technology transfer?	121
7.1.2	Companies without expenditures for but with contacts to universities	122
7.1.2.1	Why and how did the company establish contacts to universities?	124
7.1.2.2	How satisfying are your contacts with universities?	125
7.1.2.3	Is technology transfer going to change?	126
7.1.2.4	Which support services would help you to improve technology transfer?	126
7.1.3	Companies not yet having contacts to universities but interested in building up relations	127
7.1.3.1	Why did you not yet establish contacts to universities?	128
7.1.3.2	How could technology transfer start?	130
7.1.3.3	Which support services would be useful in technology transfer?	131
7.1.4	Companies not yet having contacts to universities and not being interested in building up relations	133
7.1.4.1	Why do you not want to do technology transfer?	134
7.1.4.2	What would have to happen to do technology transfer?	135
7.1.5	Summary of the interviews with company representatives	135
7.2	Interviews with university researchers	135
7.2.1	University researchers with contacts to companies	136
7.2.1.1	Why and how did it come to contacts to companies?	137
7.2.1.2	How satisfying is technology transfer currently?	138
7.2.1.3	Is technology transfer likely to change in the future and if yes how?	139
7.2.1.4	How could respective parties support technology transfer?	140

7.2.2 University researchers not yet having contacts to companies but interested in building up relations and university researchers not yet having contacts to companies and not being interested in building up relations	142
7.2.2.1 What hinders the start of technology transfer?	143
7.2.2.2 Why is the interest in technology transfer lacking?	143
7.2.2.3 What would be objectives for technology transfer?	144
7.2.2.4 How could respective parties support technology transfer?	144
7.3 Summary of interviews with university researchers	145
8 Recommendations for actions	147
8.1 Companies	147
8.1.1 Companies with expenditures for universities: Group 1	147
8.1.2 Companies with expenditures for universities: Group 2	151
8.1.3 Companies without expenditures for but with contacts to universities: Group 3	154
8.1.4 Companies without expenditures for but with contacts to universities: Group 4	156
8.1.5 Companies not yet having contacts to universities but interested in building up relations: Group 5	157
8.1.6 Companies not yet having contacts to universities but interested in building up relations: Group 6	159
8.1.7 Companies not yet having contacts to universities but interested in building up relations: Group 7	159
8.1.8 Companies not yet having contacts to universities and not being interested in building up relations: Group 8	160
8.2 University researchers	161
8.2.1 University researchers with contacts to companies: Group 1	162
8.2.2 University researchers with contacts to companies: Group 2	165
8.2.3 University researchers not yet having contacts to companies but interested in building up relations: Group 3	167
8.2.4 University researchers not yet having contacts to companies and not being interested in building up relations: Group 4	168
8.3 Proposal for a technology transfer design model	169
9 Technology transfer in Styria: Qualitative similarities and differences compared to other studies	173
10 Discussion and further need for research	181
